design and performance studies further it connects the Bauhaus exploration of space with contemporary stages and
contemporary ethics aesthetics and society The idea of theatre of space is used to highlight twentieth century practitioners
who privilege the visual aural and plastic qualities of the stage above character narrative and themes for example Schlemmer

created diverse cultures of peace and applied strategies for peaceful change The analysis draws upon the expertise of many
well respected and distinguished scholars from disciplines such as anthropology economics history international relations
journalism peace studies sociology and theology This work is divided into six parts The first three sections address the
chronological sweep of peace history from the Ancient Egyptians to the present while the last three cover biographical
profiles of peace advocates key issues in peace history and the future of peace history A central theme throughout is that the

traditional Eurocentric frameworks This volume also goes far beyond previously published handbooks and anthologies in
answering what are the strengths and limits of peace history as a discipline and what can it offer for the future It also has the
