Languages in Australian Education Anthony J. Liddicoat,Angela Scarino,2009-12-14 Australia has a reputation for sustained work in language policy and has had over 20 years of experience of language policy development During these years language policies have sought to increase and reshape languages education in Australian schools but have had only limited success in achieving their objectives This means that Australia s extensive work in language policy has not yet guaranteed a secure place for languages within education After a period of comparative neglect of languages and multiculturalism Australia is now entering a new phase of activity in language policy and it is timely to consider critically what has and has not been achieved to date and the reasons why The aim of this book is to examine the current state nature role and purposes of languages in Australian education as a basis for considering a viable encompassing language education policy The book is divided into four specific focus areas for discussion each of which is based on a core theme in Australian languages education engaging with diversity the current state of policy and participation in languages education and languages teacher education current orientations to languages education and future possibilities and directions in languages education Underlying the discussion is the recognition that at this particular juncture in languages education policy in Australia it is necessary to re examine constructs research evidence and practice as the basis for renewal The book presents a collection of papers dealing with each of the themes and aims to give greater focus to the contemporary debates around languages in education in Australia and more generally

Resisting Qualifications Reforms in New Zealand ,2019-02-18 New Zealand has been a veritable laboratory for a range of social experiments in the last twenty years including an arranged marriage with neo liberal economic policies during the late 80s and 90s These experiments extended to education where students teachers teacher educators and researchers have experienced wide ranging reforms in administration curriculum and qualifications The most contentious of these have been a series of untried and radical qualifications reforms This book offers a critical examination of these reforms from the perspective of a group of educators who resisted them by doing the

unthinkable devising their own national qualification and making it work **Classroom Discourse Analysis** Frances Christie, 2005-01-01 This book offers a model of classroom discourse analysis that uses systemic functional linguistic theory and associated genre theory to develop a view of classroom episodes as curriculum genres some of which operate in turn as part of larger unities of work called curriculum macrogenres Drawing on Bernstein's work Christie argues that two registers operate in pedagogic discourse a regulative register to do with the goals and directions of the discourse and an instructional register to do with the particular content or knowledge at issue Each can be shown to be realized in distinctive clusters of choices in the grammar The operation of the regulative register determines the initiation pacing sequencing and evaluation of the overall pedagogic activity The book sets out the its methodology in detail by reference to a number of classroom texts and a range of school subjects Overall schools emerge as sites of symbolic control in a culture **Questions of English** Jeanne Gerlach, Annette Patterson, Robin Peel, 2002-11 Offers a lively and accessible guide through past and present debates about the English curriculum which will appeal to students and practising teachers Writing = Learning Brenton Doecke, Graham Parr, 2005 Affirming the professional knowledge practice and engagement of teachers in the face of recurring media attacks on their profession this examination of the role of writing in various teaching and learning contexts by English teachers provides richly reflective perspectives on the relationship between the writing and learning of both students and professionals Critical Literacy in the Classroom Wendy Morgan, 2002-01-04 Critical literacy investigates how forms of knowledge and the power they bring are created in language and taken up by those who use texts It asks how language might be put to different more equitable uses and how texts might be recreated in a way that would tell a different story This book is a carefully documented and critically analysed example of the growing emphasis on critical literacy in syllabuses government reports and the like It bridges the gap between academics theorizing and teachers work describes how secondary teachers have planned and implemented critical literacy curricula on a range of topics from Shakespeare to the workplace listens to teachers reflecting on their teaching and analyses classroom talk extrapolates from present practice to a future critical literacy in a digitised hypermedia world Teachers and students of education critical literacy advocates and theorists of literacy and schooling can learn much more from this book which shows how critical literacy teachers and their students are contributing to the ongoing reinvention of English education as critical literacy *The International Handbook of Educational Research in the Asia-Pacific Region* J.P. Keesee, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely

directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

Resources in Education ,2001 Australian National Bibliography ,1996 **What Teachers Need to Know about Spelling** Peter Westwood,2008 What Teachers Need to Know About Spelling bridges the gap between knowledge accumulated from research on spelling acquisition and the practicalities of teaching spelling more effectively in schools Current trends are examined alongside community views on spelling standards because this is the context in which change is beginning to occur Spelling contains practical suggestions on methods and activities applicable to all students supplemented by specific advice on assessment and links to additional resources English in Australia ,2007
