English Landed Estate In The Nineteenth:

English Landed Society in the Nineteenth Century F.M.L. Thompson, 2013-12-19 First published in 2006 This book contributes towards a more just appreciation of the relative importance of the different major social groups in the life of the country It deals in the main with the economic history of the landed interest and with its role as a social group and includes much agrarian and some industrial history as seen from the landowners point of view The first seven chapters of the book aim to present an analysis and description of the main elements in the institutions and way of life of the landed classes suggesting their significance for society at large and emphasizing the forces of change which were at work within an order which in many ways presented a remarkably stable appearance to the outside world The last five chapters take up the theme of change and examine the dynamic elements in the economic social and political life of the group in a sequence of chronological subdivisions of the century and a half with which this book is concerned

The English Landed Estate in the Nineteenth Century David Spring, 2019-12-01 Originally published in 1963 The English Landed Estate in the Nineteenth Century Its Administration deals principally with the administration of large landed estates during the years from 1830 to 1870 The book also throws new light on the work of the Inclosure Commissioners who as a department of the central government supervised agricultural improvements made by landowners who borrowed from the government and from land companies Author David Spring argues that the British government intervened in agriculture much more than is commonly thought In describing the hierarchy of estate management Spring relies wherever possible on hitherto unused family papers and estate documents Especially important is his material on the Dukes of Bedford and on the domestic economy and financial position of the Russell Family The chapter titled The Landowner based on the seventh Duke of Bedford s correspondence with his agent is a case study of a single estate and provides insight into the workings of a great landowner s mind The remaining chapters dealing with lawyers land agents and the Inclosure Commissioners include other individual portraits Among these are Christopher Haedy the Duke of Bedford s chief agent James Loch king of estate agents in nineteenth century England Henry Morton the Earl of Durham s land agent and William Blamire and James Caird two of the Inclosure Commissioners

Financing the Landed Estate Carol Beardmore, 2019-05-10 While there is an extensive historiography which explores English agriculture in the nineteenth century there has been less attention paid to individual estates and in particular the role of the land agent within their management administration and participation in rural community relationships Nowhere is this more obvious in the lack of research into the financial history of the landed estate even though in the early nineteenth century these were some of the largest businesses in England The Castleman letters are a rich source which detail the intricate working financial social and political relationships which constituted the foundation of the landed estate The vouchers of which more than 10 000 have

survived alongside the rental accounts have rarely been examined. On their own they illustrate for example the sums paid out on maintenance, the interest payments on mortgages, charitable expenditure, spending on property repairs, and one off payments for a wide and diverse range of items. Together with the diurnal correspondence, all three aspects of the archive detail the daily financial undertakings and form the foundation of a new financial history of the estate. This book will show that estate management was underpinned by an inherent understanding of the financial decisions which needed to be taken and will be of interest to academics and researchers of financial history.

The Underdraining of Farmland in England During the Nineteenth Century A. D. M. Phillips, 1989-11-16 Underdraining has been recognized as one of the major capital intensive agricultural improvements of the nineteenth century. Over half the agricultural area of England is subject to waterlogging and is in need of some form of underdraining, rendering the improvement both technically and economically basic to much of English agriculture. By removing excess soil water, the object of underdraining was to reproduce as far as possible the conditions of free draining land which was workable all year round and to create an optimum soil moisture content for both plant growth and cultivation. Despite the necessity for the improvement, a wide ranging debate exists in the literature on the extent, effectiveness, and agricultural importance of underdraining in the nineteenth century. The present study attempts to resolve this debate. By examining the evidence of draining loans under the Public Money Draining Acts and of the various land improvement companies and the accounts of estates in Devon, Northamptonshire, and Northumberland, a precise record has been provided for the first time of the spread of underdraining in England in the nineteenth century, of the factors involved in its adoption, and of its impact on agricultural practice in that period.

Law and Society in England 1750-1950 William Cornish, Stephen Banks, Charles Mitchell, Paul Mitchell, Rebecca Probert, 2019-10-31 *Law and Society in England 1750-1950* is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state. In this new updated edition, the authors explore the complex relationship between legal and social change. They consider the ways in which those in power themselves imagined and initiated reform, and the ways in which they were obliged to respond to demands for change from outside the legal and political classes. What emerges is a lively and critical account of the evolution of modern rights and expectations, and an engaging study of the formation of contemporary social, administrative, and legal institutions and ideas, and the road that was travelled to create them. The book is divided into eight chapters: Institutions and Ideas; Land; Commerce and Industry; Labour Relations; The Family; Poverty and Education; Accidents and Crime. This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law, political science, and social history.

Investment Banking in England 1856-1881 (RLE Banking & Finance) Phillip Cottrell, 2012-11-27 This and the following volume chart the history of financial institutions in England in the mid late nineteenth century as well as examining the periods of boom and bust their causes and effects Using hitherto unpublished sources from the International Financial Society this book provides an unrivalled record of the development of the modern banking industry **The Cambridge Economic History of Europe** H. J. Habakkuk, Michael Moises Postan, 1965 The Changing Countryside in Victorian and Edwardian England and Wales Pamela Horn, 1984 This book traces the nature of change within the country community of England and Wales between 1870 and 1918 a period that was in many respects a watershed in British history Horn reveals the powerful underlying stresses and tensions of rural life people experienced the anxieties of agricultural recession the declining influence of the landed classes the diminishing support for religious institutions and the disruption of many traditional aspects of rural life **The Survival of the Hessian Nobility, 1770-1870** Gregory W. Pedlow, 2014-07-14 Here is a broad and richly documented examination of a little studied social group the German nobility outside Prussia Gregory Pedlow considers the nobles of the small but representative state of Hesse Kassel from the end of the ancien regime to the era of German unification Although this period has been most often described in terms of the triumph of the bourgeoisie the author shows that landholding Hessian nobles were able to preserve much of their political prestige and social and economic power during these years By demonstrating a mixture of conservatism and flexibility instead of blind reaction the Hessian nobility maintained its position as a landed elite The author focuses on four main areas the noble family with material showing changes in marriage patterns and family size and the impact of such demographic changes on inheritance practices noble landownership with documentation as to how noble landholdings and landed income survived the loss of traditional noble privileges and payments by peasants noble occupations with information including collective biography showing nobles education career choices and degree of success in obtaining positions in government service and the nobility's political response to the growing pressure for reform during the nineteenth century Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase

access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
