compulsory schooling at the Gymnasium by one year By now all the other federal states have followed and therefore also made the decision for a reduced duration of only eight years at the Gymnasium After many heated discussions also the North Rhine Westphalian ministry of education decided for a reduction of the duration of compulsory schooling at the Gymnasium As a consequence of this decision students of two grades G8 and G9 students entered the upper secondary level at all North Rhine Westphalian Gymnasien on August 31st 2010 Ministerium f r Schule und Weiterbildung des Landes Nordrhein Westfalen n d a The students of this so called Doppeljahrgang will all graduate in 2013 and therefore all of them will have to pass the same Abitur exams Hence it must be guaranteed that G8 students have the same preconditions as G9 students despite having one year less of general schooling before graduating Since no students have entered the upper secondary level after only five years at the Gymnasium in North Rhine Westphalia before 2010 empirical research in this area is hardly available by now Nevertheless this Doppeljahrgang offers the unique chance of directly comparing G8 and G9 students in order to find out in how far the new G8 system was implemented successfully or not Especially in the context of learning

Assessing Listening for Chinese English Learners Pan

Zhixin, 2016-12-08. This book reports in detail the newly developed Communicative Listening Comprehension Test (CLCT) for the National College English Test (CET) of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer (1996), in particular, the project develops CLCT for CET 4 and CET 6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently, based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests, CLCT 4 and CLCT 6 test specifications are developed. Finally, sample papers are produced, and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly developed notes completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice, this research provides valuable insights into listening test development for other large-scale tests.
