## Speak

- we use it in more formal situations and wish to emphasise that sth is important

*I will speak to management and ask them to increase our salaries.*

- we use it when we're referring to languages

*He can speak 3 languages.*

- we use it when we're talking about making an address to a large gathering or crowd

*The senior manager will speak at the end of the conference.*

## Talk

- we use it in a more relaxed setting, in a conversational situation

*I was talking to your mum the other day.*

*We talked all night about our favourite movies.*

## English With A Difference:

**English Adjectives of Comparison** Tine Breban, 2010-07-19 The book is concerned with a hitherto underresearched grammaticalization process the development from quality attributing adjective to determiner in the English noun phrase It takes a bottom up approach based on extensive synchronic and diachronic corpus studies of six English adjectives of comparison other different same identical similar and comparable Their functional diversity in current English is proposed to constitute a case of layering representing the original descriptive use which expresses how like unlike each other entities are and a range of grammaticalized referential uses which contribute to the identification and or quantification of the entities denoted by the NP Diachronic and comparative data material is invoked to verify and further develop the grammaticalization hypothesis The development of adjectives of comparison involves several key concepts identified in the literature Crucially it is described as a case of textual intersubjectification driven by the optimization of recipient design The actual grammaticalization paths are diverse and are characterized by lexical as well as structural persistence i e the same lexical meaning develops into different grammatical functions in different syntagmatic configurations In order to define the NP as a locus of diachronic change this study offers a new angle on the description of adjectives and the modelling of NP structure It advocates the abandonment of the traditional class based model in favour of a radically functional one in which functions are defined in terms of prototypicality so as to allow for gradience between and within them The described grammaticalization processes involve developments from prototypical lexical to grammatical reference related use within the adjectival category which can be the starting point of further gradual change to determiners The traditional relation between classes and positions is envisaged as a correspondence between functional and syntactic zones The change in form concomitant with grammaticalization in the NP is argued to consist of the reconfiguration of structural combinatorics and progressive leftward movement The book is of interest to linguistic researchers and graduate students in linguistics who focus their attention on grammaticalization and subjectification the functional description of adjectives questions of deixis and theoretical issues relating to nominal reference *A Corpus-based Contrastive Study of the Appraisal Systems in English and Chinese Scientific Research Articles* Xu Yuchen, Yan Xuan, Su Rui, Kou Ying, 2021-12-28

Appraisal is the way language users express their attitude towards things people behaviour or ideas In the last few decades significant achievements have been made in Appraisal Theory research yet little attention has been paid to appraisal in scientific texts especially in relation to the contrast to how it is applied in English and Chinese This title examines the similarities and differences of Appraisal systems in English and Chinese scientific research articles Using a self constructed corpus of scientific research articles the authors make cross linguistic comparisons in terms of the quantity and distribution patterns of categories of appraisals They creatively categorise articles into theoretical scientific research articles and applied studies and discover that for both languages each genre can have its own favorite mode of distribution for the realization of appraisal systems In addition this

research helps appraisal theory systems to become more explicit specific and more applicable for the analysis of scientific research articles Students and scholars of applied linguistics comparative linguistics and corpus linguistics will find this an essential reference

**Think in English** Nilam Pathak, Anshuman Sharma, 2021-11-04

English is an international language which means that the communication with most people other than your fellow native speakers would be in English The present time requires us to interact with other people either digitally or physically for business education social or personal purposes This fact itself is enough to present the importance of English in our life Governments educational boards universities and institutions have made sure that English remains an important part of the curriculum Kids accept English as one of their major subjects since the beginning of their education For years they learn about various segments of the English language with a constant increase in complexity There are taught grammar sentence formation word power pronunciation and writing paragraphs in English It is logical to assume that all these students will easily be able to converse in English but that is the pain point Most people with a native language other than English have difficulty communicating with others in spoken English It is ironic to know that a person with the ability to write in English and well conversant in grammar rules would struggle to speak in English fluently But this truth is faced by a large percentage of people who aspire to speak fluent English Where is the problem The problem is in realizing the truth about learning languages English is the second language for most people except native English speakers in countries like England the United States of America Australia and Canada The

difficulty of learning a second language is that it is learned by keeping the native language at the foundation This means that English will be learned with reference from their native language like translations similarities in syntax grammar rules words and sentence formations It is also dependent on the education system which focuses on training grammar rules translations and written English It is assumed that spoken English will come naturally to the students sadly that never happens It is easy to find students in English medium schools and colleges struggling to present a topic in English Most will avoid interactions in English using the native language as the fundamental language of communication Another fact is known to all one of the top skills required to get any decent job is fluency in spoken English The solution is the realization that spoken and written English have equal importance but must be taught differently The methodology specified in the book is based on the philosophy that the language should be taught and learned like the native speaker just the way we learned our native language The idea will be explained and discussed in detail in the coming chapters      **Real English** James Milroy, Lesley Milroy, 2014-06-03 While it is accepted that the pronunciation of English shows wide regional differences there is a marked tendency to under estimate the extent of the variation in grammar that exists within the British Isles today In addressing this problem Real English brings together the work of a number of experts on the subject to provide a pioneer volume in the field of the grammar of spoken English
