to interact with digital media effectively to exploit these amazing new technologies to their full potential for the benefit of society. This resource from the RSC gives teachers of chemistry the practical help needed to integrate ICT into their teaching and stimulate the enthusiasm of a new generation of scientists in the exciting new areas of chemistry that are opening up such as Nanoscience and Nanotechnology. Furthermore, it will be highly effective in developing the new ethos of sustainability that will be a major driving force behind the next advances in chemistry that are vital if we are to survive the manifold problems confronting society in the next few decades. This resource is ideal for all secondary teachers of chemistry, trainee teachers and university lecturers.
