Enjoy Your Cells:

Enjoy Your Cells Frances R. Balkwill, Mic Rolph, 2001-10-25 *Enjoy Your Cells* is a new series of children's books from the acclaimed creative partnership of scientist author Fran Balkwill and illustrator Mic Rolph. The titles in the series include *Enjoy Your Cells*, *Germ Zappers*, *Have a Nice DNA*, *Gene Machines*. Once again they use their unique brand of simple but scientifically accurate commentary and exuberantly colorful graphics to take young readers on an entertaining exploration of the amazing hidden world of cells, proteins and DNA. It's over ten years since Fran and Mic invented a new way of getting science across to children. Think what extraordinary advances have been made in biology in that time and how often those discoveries made headlines: Stem cells, cloning, embryo transfer, emerging infections, vaccine development. Here in these books are the basic facts behind the public debates. With these books children will learn to enjoy their cells and current affairs at the same time. And they're getting information that has been written and reviewed by working scientists so it's completely correct and up to date. Readers aged 7 and up will appreciate the stories, lively language and with help even younger children will enjoy and learn from the jokes and illustrations, no expert required. This series is a must for all elementary school students and those who care about educating them to be well informed in a world of increasingly complex health related and environmental issues. Fran Balkwill is Professor of Cancer Biology at St Bartholomew's Hospital and the London Queen Mary School of Medicine. Mic Rolph is a graphic designer with much television and publishing experience. Together they have created many books for children and have won several awards including the prestigious COPUS Junior Science Book Prize.

Recommended for ages 7 and up. **Healing by Contacting Your Cells** Barbara Wolf, Margaret Fikioris, 2008-11-14 This book written in a quick easy to read e-mail style is a true account of a spiritual journey taken by the authors to find a cure for cancer signals not responding to standard or alternative medical treatments. They had no maps for their journey to show which roads to travel or even what the terrain looked like ahead. They had only their intuition. With that they forged ahead without looking back, taking many many roads and in the end there was success. This unique book can be

viewed as a roadmap with pointers that can be used to create spiritual journeys for others with similar disease problems

The Human Addictions Valentin Matcas, 2016-04-20 Humans always seek pleasure humans venerate pleasure but are humans sentient or feelers by nature the way science depicts them Because if humans are defined as feelers and if they are expected to behave as feelers then this remains their meaning in life and in the world always to feel good to feel everything and to live life feeling the best even addicted Yet as you notice humans excel at reasoning the most and not mainly at feeling which describes more the animal kingdom Pleasure is very good and it is better than pain yet there is a difference between feeling and reasoning Because reasoning is more about mastering life and the world while feeling is about celebrating these Yet even this statement is insufficient because feelings are not even abilities within your cognitive system but feelings are only meant to signal needs and their fulfillment rewarding or punishing you depending on circumstances While reasoning is your main cognitive ability and you should treasure it accordingly This lack of understanding makes a difference because if you happen to live your life valuing feelings including your good feelings more than your actual human abilities including all your cognitive abilities then feelings and pleasure in special remain your focus and meaning in life And with the multitude of artificial sources of pleasure that society offers good luck to you because it is only a matter of time before you too become addicted Since as we notice throughout the book becoming addicted is not only an error of judgment that you make while trying to feel good in life as everyone else it is not only a social constraint subduing you as everyone else but addiction is integral part of the normal natural process of your cognitive system and it is even used by your subconscious intelligence in various circumstances in order to render you always eager to fulfill specific highly important activities in life as it is the case with your natural need for reproduction You have to comprehend society as it is because once you are addicted you become weak predictable and controllable and this is how others take over your living and social niche to exploit you While you end up struggling with family problems finance problems and health problems ever after Would you like to be able to manage your life your thinking and your behavior Then you have to be able to manage your feelings first And you may do so not forcefully and not directly since you are not a mechanism but you can manage your feelings only by learning everything about your feelings needs development addictions intelligences reasoning behavior society Life the world and your meaning and place in Life and in the world This book creates an entire model of the human addictions which is still easy to read teaching you everything about drugs and how they work about pleasure and how it controls you and about the world and how it interacts with you before and during addictions If you want to learn more about addictions consequences and withdrawal this book is for you
