Skills in the Green Economy through the Advanced Training Programs on Cradle to Cradle Elina Priedulena,Max Hogeforster,Baltic Sea Academy .,2016-08-15 Energy efficiency climate and biodiversity protection are among the top priorities of the EU and all member states In order to meet the challenges of growing landfills scarcity of resources air pollution to name only a few of them new ways of thinking and of economic activities are essential This is exactly what the Cradle to Cradle C2C concept delivers products flow in infinite material life cycles thus being economically successful conducive to the environment and healthy for consumers without producing any waste Cradle to Cradle concept born as vision by Prof Dr Michael Braungart and William McDonough in 1990ies has become real It is well known on the world market more than 1 500 products have been developed Despite the advantages the Cradle to Cradle approach has mostly been used by big companies and is hardly known in SMEs Thus a EU funded project was started in 2014 to develop trainings for Cradle to Cradle for SMEs This book contains the training including train the trainer experiences and presentations made at the final conference in 2016 It contains substantial contributions by authors like Michael Braungart Thomas Straubhaar and others **Law and Agroecology** Massimo Monteduro,Pierangelo Buongiorno,Saverio Di Benedetto,Alessandro

Isoni,2015-05-06 This book represents a first attempt to investigate the relations between Law and Agroecology There is a need to adopt a transdisciplinary approach to multifunctional agriculture in order to integrate the agroecological paradigm in legal regulation This does not require a super law that hierarchically purports to incorporate and supplant the existing legal fields rather it calls for the creation of a trans law that progressively works to coordinate interlegalities between different legal fields respecting their autonomy but emphasizing their common historical roots in *rus* in the process *Rus* the rural phenomenon as a whole reflects the plurality and interdependence of different complex systems based jointly on the land as a central point of reference Rural is more than agricultural if agriculture is understood traditionally as an activity aimed at exploiting the land for the production of material goods for use consumption and private exchange rurality marks the reintegration of agriculture into a broader sphere one that is not only economic but also social and cultural not only material but also ideal relational historical and symbolic and not only private but also public In approaching *rus* the natural and social sciences first became specialized multiplied and compartmentalized in a plurality of first order disciplines later they began a process of integration into Agroecology as a second order multi perspective and shared research platform Today Agroecology is a transdiscipline that integrates other fields of knowledge into the concept of agroecosystems viewed as socio ecological

systems However the law seems to still be stuck in the first stage Following a reductionist approach law has deconstructed and shattered the universe of law into countless disjointed legal elementary particles multiplying the planes of analysis and in particular keeping Agricultural Law and Environmental Law two separate fields
