## Ecology Of Sulawesi:

**Ecology of Sulawesi** Tony Whitten, Greg S. Henderson, 2012-06-19 The Ecology of Sulawesi is a comprehensive ecological survey of one of Indonesia's least populated and most diverse islands. It is hoped that it will prove useful to resource managers, ecologists, environmental scientists, and local government personnel and be enlightening to Sulawesi's inhabitants and visitors. Sulawesi is one of the least known islands of Indonesia and wise environmental management including the proper assessment of environmental management including the proper assessment of environmental impacts arising from development projects and other activities is currently very difficult. *Ecology of Sulawesi*, 1987. The Ecology of Sulawesi Tony Whitten, Muslimin Mustafa, Gregory S. Henderson, 1987. **The Ecology of Sulawesi** Tony Whitten, 1985. **The Ecology of Sulawesi** Anthony J. Whitten, 1985. *The Ecology of Sulawesi - Preliminary Bibliography - Environmental Manpower Development in Indonesia* Indonesia. Kantor Menteri Negara Kependudukan dan Lingkungan Hidup, Anthony J. Whitten, 1985. *Ecology of Insular Southeast Asia* Friedhelm Goltenboth, Kris H. Timotius, Paciencia P. Milan, Josef Margraf, 2006-12-07. The textbook entitled *Tropical Ecology of Southeast Asia: The Indonesian Archipelago* unfolds in its 5 major chapters with 20 subchapters on more than 500 pages with more than 300 figures. The basic principles of ecology with examples mainly coming from the Indonesian Archipelago. After an introduction describing the geography, geology, and climate of the region, the second chapter is dedicated to marine and freshwater ecosystems. Chapters on the functional ecology of seagrass beds, coral reefs, open ocean, and deep sea are followed by information on lotic and lentic freshwater ecosystems. In chapter III, ecotones and special ecosystems of the archipelago are in focus. The ecology and ecosystems of shore and tidal flats, mangroves, estuaries, and soft bottom shores, caves, small islands, grasslands, and savannas are described. The forest ecosystems with beach forest, tropical lowland evergreen rainforest, some special forest systems, and mountain forests form the contents of chapter IV. The final chapter V is dealing with agroecosystems and human ecology. The main focus in this chapter is ricefield ecology, land use systems, and social ecology including the advent of man and the development and expansion of man influencing this archipelago. An extended glossary and bibliography is added, as well as tables of abbreviations, conversion factors, international system of units and measurements or SI, and a geological time table and systematics. The index gives access to important keywords and relevant information spread throughout the contents of the book. The textbook will certainly be useful to teachers, lecturers, and their students at university and college level. It also gives an overview about insular ecology of the vast Indonesian archipelago to any interested person or working ecologist. Focuses on the tropical ecology and insular ecosystems and biodiversity of Indonesia, as well as the agroecology of humid tropics. Contains over 300 figures. Provides an extended glossary and bibliography, as well as tables of abbreviations, conversion factors, international system of units, and a geological time table. Easy to use index gives access to important keywords used throughout the text. *Ecology, Conservation and Management of Wild Pigs and Peccaries* Mario Melletti, Erik

Meijaard,2017-11-23 Wild pigs inhabit vast areas in Europe Southern Asia and Africa and have been introduced in North and South America while feral pigs are widespread in Australia and New Zealand Many wild pig species are threatened with extinction but Eurasian wild boar populations however are increasing in many regions Covering all wild pig and peccary species the Suidae and Tayassuidae families this comprehensive review presents new information about the evolution taxonomy and domestication of wild pigs and peccaries alongside novel case studies on conservation activities and management One hundred leading experts from twenty five countries synthesise understanding of this group of species discussing current research and gaps in the knowledge of researchers conservation biologists zoologists wildlife managers and students This beautifully illustrated reference includes the long history of interactions between wild pigs and humans the benefits some species have brought us and their role and impact on natural ecosystems *Biodiversity Hotspots* Frank E. Zachos,Jan Christian Habel,2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition sensu stricto and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution *Our Ancient Lakes* Jeffrey Mckinnon,2023-10-17 The unexpected diversity beauty and strangeness of life in ancient lakes some millions of years old and the remarkable insights the lakes are yielding about the causes of biodiversity Most lakes are less than 10 000 years old and short lived but there is a much smaller number of ancient lakes tectonic in origin and often millions of years old that are scattered across every continent but Antarctica Baikal Tanganyika Victoria Titicaca and Biwa to name a few Often these lakes are filled with a diversity of fish crustaceans snails and other creatures found nowhere else in the world In *Our Ancient Lakes* Jeffrey McKinnon introduces the remarkable living diversity of these aquatic bodies to the general reader and explains the surprising often controversial findings that the study of their faunas is yielding about the formation and persistence of species The first single authored volume to synthesize studies of ancient lakes *Our Ancient Lakes* provides an overview of the lakes and their distinctive geological origins accounts of the evolutionary processes that have generated the incredible diversity found in the lakes and produced some of the fastest speciation rates known for vertebrates the surprisingly

important role of interspecies mating in the most rapid diversifications the uniquely complete records of the creatures that inhabited the lakes which are being extracted from deep lake sediments the prospects for the lakes as we tumble into the Anthropocene and much more Shining a light on a class of biodiversity hot spot that is equivalent to coral reefs in the ocean or tropical rainforests on land Our Ancient Lakes chronicles in a refreshingly personal and accessible way the often singular wonders of these venerable water bodies The MIT Press gratefully acknowledges Furthermore a program of the J M Kaplan Fund

**Ecology of Java & Bali** Tony Whitten, Roehayat Emon Soeriaatmadja, Suraya A. Afiff, 1996 Java and Bali are the best known of all the islands in Indonesia and nowhere else in the country are ecological issues so acute This book provides invaluable ecological data so that development activities can be viewed in light of their ecological and social impacts These eagerly awaited volumes are the result of four years of research into the status of Indonesian coastal and marine ecosystems They chart the extraordinary treasure trove of the areas marine biodiversity and discuss the problems that have resulted from current population pressures and economic development

**Ecology, Evolution and Behaviour of Wild Cattle** Mario Melletti, James Burton, 2014-10-30 A beautifully illustrated reference work on the biology ecology conservation status and management of all thirteen species of wild cattle and buffalo This book will be a valuable resource for students researchers and professionals in animal behaviour behavioural ecology evolutionary biology and conservation biology

**Economics and Ecology of Diversification** François Ruf, Götz Schroth, 2015-09-23 The monoculture systems that have been encouraged by governments since the 1960s have led to major socio economic and environmental crises Now the diversification of tree crop systems is advancing throughout the tropics Why and when does diversification take place What categories of farmers diversify What obstacles do they have to overcome and how do public and private policies interfere in this process How do land use systems and landscapes evolve as a result of this diversification According to the authors of this volume diversification is certainly a response to market risks but also to the depletion of environmental resources Ecological changes such as declining soil fertility and increasing pressure from pests diseases and weeds intensify at the end of monoculture cycles driving crop change and diversification of farming systems Through 15 case studies from Africa Latin America Asia and the Pacific the authors provide us with in depth insights into the economy and ecology of family agriculture and its recent developments

**The Bugis** Christian Pelras, 1997-01-23 The Bugis who number about three million live for the most part in the Indonesian province of South Sulawesi they are among the most fascinating peoples of maritime Southeast Asia and the least known Their image in legend and modern fiction is of bold navigators fierce pirates and cruel slave traders but most are in fact farmers planters and fishermen Although they are an Islamic people they maintain such pre Islamic relics as transvestite pagan priests and shamans Their colorful nobility claims descent from the ancient gods yet owes its power to social consensus This book is the first to describe the history of the Bugis It ranges from their origins 40 000 years ago to the present and provides a complete picture of contemporary Bugis society It is based on the author s extensive

field research over the last 30 years on oral tradition written epics and chronicles on travellers tales from the sixteenth to the nineteenth centuries and on the latest research by Western and Asian scholars in the fields of archaeology history linguistics and anthropology The author reveals the brilliance of Bugis civilization in all its exotic and extraordinary manifestations and its survival through Dutch colonization Japanese invasion and the incursions of modernity This is a work of outstanding scholarship interest and originality

*Ecology and Conservation Status of Tarsius Bancanus Saltator on Belitung Island, Indonesia* Indra Yustian, 2007

**Science for the Protection of Indonesian Coastal Ecosystems (SPICE)** Tim C. Jennerjahn, Tim Rixen, Hari Eko Irianto, Joko Samiaji, 2021-10-13 Science for the Protection of Indonesian Coastal Ecosystems SPICE provides key information on all aspects related to the management of coastal ecosystems This includes the coastal management involved the ecology of this area and the relationship between humans and the environment found here The book presents guidelines defined by scientific experts allowing for proper application of science products into ecosystem management The bio geo physical importance of coastal ecosystems of Indonesia makes this a book of global importance and interest Written by an Indonesian German author team giving a unique and global perspective on the coastal ecosystems Presents text boxes with research gaps and policy implications giving the reader an easy grasp of what needs to be done in terms of research and management Features best practice case studies that can be applied to coastal ecosystems around the world offered through the lens of Indonesia a region of global relevance in terms of climate and environmental change

**Tropical Rainforests and Agroforests under Global Change** Teja Tscharntke, Christoph Leuschner, Edzo Veldkamp, Heiko Faust, Edi Guhardja, Arifuddin Bidin, 2010-02-04 not only for land use systems that depend on the regular supply of rain or irrigation water but also for the future development of natural rainforests as drought stress has been shown to affect tree growth and species composition in old growth forests Wright 1991 Walsh and Newbery 1999 Engelbrecht et al 2007 A drought experiment conducted in a cacao agroforestry plantation showed that this plantation was surprisingly resilient to an induced drought of more than a year Schwendenmann et al 2009 However droughts can have a strong impact on household incomes from agriculture they strongly affect the vulnerability to poverty and thus have to be analyzed as important exogenous shocks to households forcing them to adjust their behaviour and develop strategies to cope with these problems The stability of rainforest margins is a critical factor in the protection of tropical rainforests Tscharntke et al 2007 At present however rainforest margins in many parts of the tropics are far from stable both in socioeconomic and in ecological terms For example protected areas may attract rather than repel human settlement which may be due to international donor investment in national conservation programs Wittemeyer et al 2008 An alternative hypothesis is that protected areas might be compromised if leakage takes place that is if impacts that would take place inside the restricted area are displaced to a nearby undisturbed area Ewers and Rodrigues 2008

*The Ecology and Conservation of Asian Hornbills* Margaret F. Kinnaird, Timothy G. O'Brien, 2007 Hornbills are among the world's most distinct birds Easily recognized by their oversized

beaks adorned with large casques they range from Africa to India and throughout Asia One of the oldest bird orders they have been known to mankind for millennia and loom large in the mythology of indigenous cultures of tropical Asia In the past thirty years ecologists have uncovered many fascinating aspects of hornbill biology from their unique nest sealing behavior to their roles as farmers of the forest Building on fourteen years of research Margaret F Kinnaird and Timothy G O'Brien offer in *Ecology and Conservation of Asian Hornbills* the most up to date information on the evolution reproduction feeding ecology and movement patterns of thirty one species of Asian hornbills The authors address questions of ecological functionality ecosystem services and keystone relationships as well as the disturbing influence of forest loss and fragmentation on hornbills Complemented by superb full color images by renowned photographer Tim Laman that provide rare glimpses of hornbills in their native habitat and black and white illustrations by Jonathan Kingdon that highlight the intriguing aspects of hornbill behavior *Ecology and Conservation of Asian Hornbills* will stand tall in the pantheon of natural history studies for years to come

**The Ecology of Tropical East Asia** Richard Corlett, 2014 An updated edition of the only book dedicated to the terrestrial ecology of the East Asian tropics authored by a world renowned tropical ecologist

**The Behavioral Ecology of the Tibetan Macaque** Jin-Hua Li, Lixing Sun, Peter M. Kappeler, 2019-11-18 This open access book summarizes the multi disciplinary results of one of China's main primatological research projects on the endemic Tibetan macaque *Macaca thibetana* which had continued for over 30 years but which had never been reported on systematically Dedicated to this exceptional Old World monkey this book makes the work of Chinese primatologists on the social behavior cooperation culture cognition group dynamics and emerging technologies in primate research accessible to the international scientific community One of the most impressive Asian monkeys and the largest member of its genus the Tibetan macaque deserves to be better known This volume goes a long way towards bringing this species into the spotlight with many excellent behavioral analyses from the field Frans de Waal Professor of Psychology Emory University USA

Macaques matter To understand primate patterns and trends and to gain important insight into humanity we need to augment and expand our engagement with the most successful and widespread primate genus aside from *Homo* This volume focuses on the Tibetan macaque a fascinating species with much to tell us about social behavior physiology complexity and the macaque knack for interfacing with humans This book is doubly important for primatology in that beyond containing core information on this macaque species it also reflects an effective integrated collaboration between Chinese scholars and a range of international colleagues exactly the type of collaborative engagement primatology needs This volume is a critical contribution to a global primatology Agust n Fuentes Professor of Anthropology University of Notre Dame USA I have many fond memories of my association with Mt Huangshan research beginning in 1983 when together with Professor Qishan Wang we established this site It is such a beautiful place and I miss it It is gratifying to see how far research has progressed since we began work there becoming more internationalized and very much a collaborative endeavor under the long term direction

of Professor Jin Hua Li and colleagues This book highlights the increased interest in this species representing a variety of disciplines ranging from macro aspects of behavior cognition and sociality to micro aspects of microbes parasites and disease authored by a group of renowned Chinese and international primatologists I applaud their efforts and expect more interesting work to come from this site in the years ahead Kazuo Wada Professor Emeritus Kyoto University Japan
