Silvy, 2012-03 A standard text in a variety of courses the Techniques Manual as it is commonly called covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages To effectively incorporate the explosion of new information in the wildlife profession this latest edition is logically organized into a two volume set Volume 1 is devoted to research techniques and Volume 2 focuses on management methodologies The Ecology of Bird Communities: Processes and variations John A. Wiens, 1989 The two volumes of John Wiens Ecology of Bird Communities are already recognised as having applications and importance beyond the study of birds to the wider study of ecology in general The books contain a detailed synthesis of our current understanding of the patterns of organisation of bird communities and of the factors that may determine them drawing from studies from all over the world The author however does more than simply review recent findings in bird community ecology By emphasizing how proper logic and methods have or have not been followed and how different viewpoints have developed historically and have led to controversy he extends the scope of these books far beyond the study of birds Volume 1 Foundations and Patterns explores why avian community ecologists ask the questions they do and what philosophical and methodological approaches they have used to answer such questions Most of the book is devoted to a critical evaluation of what is known about the nature and organisation of bird communities Volume 2 Processes and Variations discusses the way in which bird community patterns have been interpreted This volume examines how the complexity and variability of natural environments may influence efforts to discern and understand the nature of these communities Graduate students and professionals in avian biology and ecology will find these volumes a valuable stimulus and guide to future field studies and theory development New Zealand Journal of Ecology, 1991 The Ecology of Bird Communities: Foundations and patterns John A.
