Knowledge Economy and Socialism Agustín Lage Dávila, 2024-03-31 Cuba's future must by necessity be a future of scientists. Fidel Castro proclaimed in 1960. As Agustín Lage Dávila shows in this pathbreaking book, Cuba has in fact become a global leader in both the generation and application of scientific knowledge, as demonstrated by its ubiquitous production of socially useful products, from vaccines and medicines to organic food. Speaking from his position as a noted Cuban immunologist, Dr. Lage shows how Cuba achieved such prominence, positing that the training of its scientists, their scientific practices, and their relationships with the Cuban people are intimately connected to the socialist culture that derived from the Cuban Revolution. *Size, Causes and Consequences of the Underground Economy* Friedrich Schneider, 2018-01-18

Bringing together top international researchers, this book provides a worldwide coverage of underground economic activities. It presents estimates of the underground economy for 145 countries, the most comprehensive ever undertaken, an in-depth examination of the underground economy for a select number of these countries, and an analysis of the public policy implications through an assessment of how various governments have attempted to address this issue. The book brings together the latest research on tax evasion, tax morale, and other underlying factors that have so significantly influenced participation in the underground economy. It provides a comprehensive overview of the size and development of the underground economy, its major causes and motivations, and its effects on the legitimate economy. In addition, it reviews recent public policy concerns by a number of countries and how they have responded with measures to curb these underground economic activities. *The Islamic Moral Economy* Shafiel A. Karim, 2010

The Islamic Moral Economy is an academic book that analyzes the religious permissibility or lack thereof of the existing repertoire of financial instruments used in Islamic banking and finance. The work is both timely and sound, especially considering the growth of the international Islamic banking and insurance industries and the Great Recession of 2007-2010. *The Islamic Moral Economy* is an excellent introductory book for academics and finance professionals wishing to gain a better understanding of Islamic moral constraints on economic transactions and how most current Islamic banking transactions are structured. More specifically, the author examines the utopian nature of the Islamic moral economy with a special emphasis on *riba*, i.e. financial interest and illogical increase, which is inescapable in the global interconnected economy and therefore insoluble within the framework of the Islamic Moral Economy. Unlike other books on the subject, *The Islamic Moral Economy* places a special emphasis on the ubiquity of financial interest and illogical increase in both current Islamic banking and finance as well as conventional

Paulo Davim, 2024-06-20 Circular economy can serve as a key building block for the sustainability targets of manufacturing companies Although the term itself has long been established we see that proper implementation of a circular economy model across entire manufacturing value chains is still lacking and remains a challenge for companies However there are clearly visible and good examples of circular economy standards which have already been applied generating value among multiple layers Circular Economy and Manufacturing presents these and more providing a roadmap of optimized flexible efficient effective and competitive green production strategies for the manufacturing industry and its multiple stakeholders The volume proves to be an excellent springboard for further discussion and research into new frameworks of best practices in view of achieving more socially responsible and sustainable organizations in a not so distant future Helps readers to easily identify state of the art advances in the circular economy as applied to the manufacturing industry Adopts an interdisciplinary perspective offering insights into both engineering and management components of the whole circular economy approach Includes contributions from an internal group of experts Presents methodologies and showcases their application through case studies *The Agricultural Economy of Libya* Hilda M. Canady, 1956 Circular Economy in Emergency Housing: Eco-Efficient Prototype Design for Subaşı Refugee Camp in Turkey and Maicao Refugee Camp in Colombia Pilar Mercader-Moyano, Paula Porras-Pereira, 2023-07-04 In recent years there has been an upsurge in the number of forced displacements due to natural disasters armed conflicts and pandemics which has favoured an increase in the number of temporary accommodations Although the provision of shelter after an emergency situation is one of the priorities of humanitarian aid the reality is that the conditions in which people live in a situation of forced displacement are absolutely precarious and overcrowded Nowadays this type of housing tends to have a short lifespan deepening the environmental impact and the generation of waste Likewise added to this great problem is the linear economic system implemented worldwide which also causes a high rate of waste This investigation develops an eco efficient design protocol that determines the basic premises in any emergency situation therefore avoiding the precarious nature to which those in forced displacement are exposed Moreover the research investigates different constructive solutions that can respond to situations of natural catastrophes or humanitarian disasters where emergency housing is needed as well

as the possible alternatives from the point of view of circular economy Eco efficient and environmentally correct solutions are sought which can be adaptable to the different scenarios where emergency housing may be needed thus creating a rapid easy functional and environmentally correct architecture adaptable to these types of situations The study shows that the factors that characterize emergency architecture can be an example of where the issues around the sustainability factor are applied in a practical way The main objectives of this study are to develop an eco efficient design protocol which determines the basic premises in any emergency situation and to find eco efficient and environmentally correct solutions adaptable to different scenarios which have similar climatic characteristics and where emergency housing may be needed thus creating a type of ephemeral architecture but sensitive to the user to whom it is intended and in accordance with the optimal conditions of habitability
