Reconstructions in Middle East Economic History Don Babai, 2024-10-24 This volume explores major theoretical and empirical themes in the study of the economic history of the Middle East Despite the relative neglect of economic history in Middle Eastern studies this book makes a case for its importance as a discipline of study On the one hand it shows promise in illuminating the economic base of historical trends and events on the other it can elucidate the historical foundations of economic continuity and change The chapters employ an array of theoretical and methodological approaches and ultimately demonstrate how economics and history along with political economy complement each other in studying the Middle East Among the substantive topics explored are the trajectories of the Arab Spring institutional change and economic development in the early Ottoman Empire the destructive effects of the reordering property rights in Iraq by the American led occupation authority the evolution of the political economy of the Islamic Republic of Iran and the determinants of movements in the yields of Egyptian and Ottoman sovereign debt following political and economic crises in the 19th and early 20th centuries The book will be of interest to scholars and students of economic history political economy and the Middle East

Economic Development in the Middle East Rodney Wilson, 2002-03-11 Despite its oil resources the Middle East is falling behind other regions of the developing world notably the countries of East and South East Asia Rodney Wilson examines the economic prospects for the region considering the consequences of rapid population growth including the implications for education and employment low savings levels the absence of significant inflows of private capital and foreign investment fragmentation of the banking system the basic economic infrastructure and the problems caused by excessive military expenditure falling oil prices budget deficits The author examines alternative economic directions for the region arguing that both the methods and goals of development have to be reassessed in a region where Islam prevails

Volume 7, C.1415-c.1500 Rosamond McKitterick,1995 This volume covers the last century interpreted broadly of the traditional western Middle Ages Often seen as a time of doubt decline and division the period is shown here as a period of considerable innovation and development much of which resulted from a conscious attempt by contemporaries to meet the growing demands of society and to find practical solutions to the social religious and political problems which beset it The volume consists of four sections Part I focuses on both the ideas and other considerations which guided men as they sought good government and on the practical development of representation Part II deals with aspects of social and economic development at a time of change and expansion Part III discusses the importance of the life of the spirit religion education and the arts Moving from the general to the particular Part IV concerns itself with the history of the countries of Europe emphasis being placed on the growth of the nation states of the early modern world *The Ottoman Empire and European Capitalism, 1820-1913* Sevket Pamuk,1987-09-10 Originally published in 1987 this book examines the consequences of the nineteenth century economic penetration of Europe into the Ottoman Empire Professor Pamuk makes subtle use of a very wide range of sources encompassing the statistics of most of the European countries and Ottoman records not previously tapped for this purpose His economic and quantitative analysis established the long term trends of Ottoman foreign trade and European investment in the Empire The later chapters focus on the commercialisation of agriculture and the decline as well as the resistance of handicrafts Geographically most of the volume focuses on the area within the 1911 borders of the Empire Turkey northern Greece Greater Syria and Iraq Professor Pamuk compares the relationship of the Ottoman Empire to the world economy with that of other parts of the non European world and concludes that the two distinguishing features of the Ottoman case were the environment of Great Power rivalry and the ability of the government to react against European pressures Britain in the Middle East Robert T. Harrison,2016-05-05 Britain in the Middle East provides a comprehensive survey of British involvement in the Middle East exploring their mutual construction and influence across the entire historical sweep of their relationship In the 17th century Britain was establishing trade links in the Middle East using its position in India to increasingly exclude other European powers Over the coming centuries this commercial influence developed into political power and finally formal empire as the British sought to control their regional hegemony through military force Robert Harrison charts this relationship exploring how the Middle East served as the launchpad for British offensive action in the World Wars and how resentment against colonial rule in the region led ultimately to political and Islamic revolutions and Britain's demise as a global imperial power **Wealth Accumulation and Entrepreneurship in the Ottoman Empire,**

18th to 20th Centuries Maria Christina Chatziioannou, Sophia Laiou, 2024-12-23 This book provides a significant contribution to our understanding of the Ottoman Empire's economic history particularly through its exploration of local entrepreneurship which brings new perspectives to the economic dynamics of the region This focus adds a valuable dimension to the broader narrative of Mediterranean social and economic developments from the 18th to the 20th century By emphasizing the role of both Muslim and non Muslim agents the work challenges more Eurocentric narratives that have often influenced the historiography of economic activities in this region The inclusion of Ottoman Turkish and Greek sources underlines the importance of accessing voices and records that have been underutilized in previous studies The fact that this project is a result of Greek Turkish academic cooperation is particularly noteworthy as it promotes a more nuanced and comprehensive view toward shared histories in order to shed light on complex historical phenomena This work will be of interest to scholars of Ottoman and Mediterranean history seeking to explore the nuances of economic and social change from within the Ottoman Empire It will also appeal to a wider audience interested in the history of early entrepreneurial activities and the complex interplay between cultural and economic dynamics in historical contexts *The Evolution of Middle Eastern Landscapes* John Malcolm Wagstaff, 1985-01-01 This book provides a background to the modern geography of the Middle East by tracing the evolution of humanized managed landscapes from the domestication of cereals through to the initiation of the great transformations of the region in the mid nineteenth century By examining the natural potential of the region in terms of climate natural vegetation and physical conditions and charting the emergence of basic long lasting traditional economies based on this environment the author shows how the environment stimulated traditional life styles which in turn perpetuated and molded the region *State and Society in Mid-Nineteenth-Century Egypt* Ehud R. Toledano, 2003-02-13 Previous studies of nineteenth century Egypt have often been premature in identifying the existence of an independent nation state In a way which will permanently affect our view of Egyptian history this book argues that in the mid nineteenth century period Egypt was still an Ottoman province with a provincial Ottoman elite which was only gradually becoming Egyptian Part one discusses the creation of a dynastic order in Egypt especially under Abbas Pasa 1848 1854 and the formation of an Ottoman Egyptian ruling class Part two deals with the non elite groups the vast majority of Egypt's population A final chapter offers a convincing picture of the social and cultural life of the period in a way which has never before been attempted in a Middle East context The author's valuable knowledge of Ottoman and Arabic as well as European documents and his use of a wide variety of sources including police and court records chronicles and travel literature have enabled him to make an important contribution to a neglected period of Egyptian history and indeed to our understanding of other provinces and dependencies in the region **Introduction to the Modern Economic History of the Middle East** Zvi Yehuda Hershlag, 1980 **ECMLG 2022 18th European Conference on Management, Leadership and Governance** Florinda Matos, 2022-11-10 **The Modern Middle East** Ilan Pappé, 2005 The Gulf states Two introductory

chapters on political and economic history set the broader context The main text focuses on the experience of everyday people from Ottoman and colonial times through the present Rural and urban history popular culture music literature theatre and other media women and the many faces of Islam are the chapter topics Annotation 2006 Book News Inc Portland OR booknews com
