Structural Crisis and Institutional Change in Modern Capitalism Bruno Amable, 2017-03-16 This book analyses the evolution of the French model of capitalism in relation to the instability of socio political compromises In the 2010s France was in a situation of systemic crisis namely the impossibility for political leadership to find a strategy of institutional change or more generally a model of capitalism that could gather sufficient social and political support This book analyses the various attempts at reforming the French model since the 1980s when the left tried briefly to orient the French political economy in a social democratic socialist direction before changing course and opting for a more orthodox macroeconomic and structural policy direction The attempts of governments of the right to implement a radically neo liberal structural policy also failed in the face of a significant social opposition The enduring French systemic crisis is the expression of contradictions between the economic policies implemented by the successive left and right governments and the existence of a dominant social bloc that is a coalition of social groups that would politically support the dominant political strategy Since 1978 both the right and the left have failed to find a solution to the contradictions between the policies they implemented and the expectations of their respective social bases which are themselves inhabited by tensions and contradictions that evolve with the structural reforms that gradually transformed French capitalism

interest in development finance *Changing Models of Capitalism in Europe and the U.S.* Richard Deeg, Gregory Jackson, 2016-04-14 The volume analyzes the long term trajectories of change in the capitalist models of the UK Germany Sweden France Italy Hungary Slovakia and the United States The case studies identify critical junctures and key periods of change in order to show how institutions are shaped by different sets of socio political compromises and public policy The case studies follow a common methodology comparing change and linkages across six core institutional domains thus facilitating a comparative understanding of the patterns and drivers of institutional change as well as how liberalisation impacts countries in similar and dissimilar ways The historical perspective of the cases highlights the transformative effects of relatively slow and incremental changes These case studies also make an innovative contribution to examining the linkages between four levels of institutions that regulate the economy the international macro national meso and micro The volume reveals both a common trend toward more liberal forms of capitalism but also variations on this overarching trajectory Markets themselves create their own dynamics which have varied effects on firms and other economic actors in historically diverse institutional contexts This book was originally published as a special issue of the Journal of European Public Policy

A Ruined Fortress? Alan W. Cafruny, Magnus Ryner, 2003-06-28 This challenging book argues convincingly that research on European integration has lagged behind important theoretical developments in the fields of international relations international political economy and international organization The contributors contend that prevailing theories of integration despite their considerable differences all suffer from an excessive focus on institutions and ideas while overlooking the ways in which these institutions and ideas have promoted a neoliberal agenda during the last decade To overcome these weaknesses this volume draws on one of the key strands of theoretical innovation critical political economy or transnational historical materialism to develop a more comprehensive and consistent analysis of processes of European integration Although not claiming that states have ceded their role as masters of the treaties the contributors develop innovative case studies of national and transnational processes to illustrate the salience of trans European business networks and the primacy of neoliberalism as central organizing concepts of the post Maastricht European project Contributions by Baastian van Apeldoorn Hans Jürgen Bieling Alan W Cafruny Ben Clift Stephen Gill Colin Hay Otto Holman Henk Overbeek Kees van der Pijl Magnus Ryner Thorsten Schulten Giles Scott Smith Leila Simona Talani and Matthew Watson
