**Education** Anna Saiti, Michael Chletsos, 2024-06-11 This book addresses both the subject of educational management and the economics of education. It provides insights into the relationship between the application of managerial and economic principles in the education system and the learning process which is at the core of sustainability and human well-being. It offers the appropriate framework and conditions for a smooth running of an educational organization and for applying various principles of economic science. The work enables professional practitioners, educational managers and leaders, decision makers in the field of education, educators and indeed anyone with a didactic and pedagogical role in the field of education to be more active and creative in facilitating the effective management and efficient operation of their educational organization, implement an effective human resource planning strategy as well as an appropriate selection process, be able to act effectively in the economic sector of both their professional and personal lives, manage the economic issues of educational organizations efficiently.

*Life Cycle Costing Techniques Applicable to Law Enforcement Facilities* Robert J. Kapsch, 1974 Planners, architects, engineers and others engaged in the planning, design and construction of law enforcement facilities are charged with a number of decisions that will affect future resource allocations by the agency operating the constructed facility. Such future resource allocations would include the agency's being required to provide more or fewer personnel to operate the facility, to provide more or less frequent replacement of the component parts of the facility and to provide more or less supplies to operate the facility. Decision makers should be sensitive to the economic impact of their decisions projected over the life of the facility. The analytical tool presented in this paper for the evaluation of the economic impact of various design alternatives is the technique of life cycle costing. Through the use of this technique the life cycle allocations by an agency for a law enforcement facility can be minimized.
