Economic Governance And The Challenge Of Flexibility In East Asia:

Economic Governance and the Challenge of Flexibility in East Asia Frederic C. Deyo, Richard F. Doner, Eric Hershberg, 2001 This book analyzes the institutional underpinnings of East Asia's dynamic growth by exploring the interplay between governance and flexibility in an endlessly demanding globalized marketplace. In case studies that encompass a variety of key industrial sectors and countries, the contributors emphasize the importance of network patterns of governance for facilitating flexibility in firms throughout the region. Their analyses illuminate both the strengths and limitations of recent growth strategies and offer insights into prospects for continued expansion in the wake of the East Asian economic crisis of the late 1990s. Remapping East Asia T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today. The region has at least a century-long history of internal divisiveness, war and conflict, and it remains the site of several nettlesome territorial disputes. However, a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia. In *Remapping East Asia*, T. J. Pempel suggests that the region is ripe for cooperation rather than rivalry, and that recent region-building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics. This collection is about the people, processes, and institutions behind that region-building. In it, experts on the area take a broad approach to the dynamics and implications of regionalism. Instead of limiting their focus to security matters, they extend their discussions to topics as diverse as the mercurial nature of Japan's leadership role in the region, Southeast Asian business networks, the war on terrorism in Asia, and the political economy of environmental regionalism. Throughout, they show how nation-states, corporations, and problem-specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally, semiformally, or even secretly.

Japan and East Asia in Transition H. Yoshimatsu, 2002-12-31 This book examines how Japan has changed its economic relationship with East Asia since the mid-1990s by looking at its commitments to import relief, regional financial and industrial transformations, and regionalism. While the Japanese government has taken proactive initiatives to sustain the sound development of the regional economies, it has become more strategic in preserving its interests in the rapid industrial transformation. The book includes valuable information about Japan's trade remedy measures, Sino-Japan relations, and regional integration in East Asia.
