 Roger LeRoy Miller, Alan D. Stafford, 2003-10-22 This book employs an issues approach to consumer economics Each chapter  
 has one or two consumer issues that are highlighted through engaging real world examples These real world examples are  
 highly applied aspects of everyday consumer situations      **Books in Print** ,1994      *Consumer Credit and the American  
 Economy* Thomas A. Durkin, Gregory Elliehausen, Michael E. Staten, Todd J. Zywicki, 2014-07-16 Consumer Credit and the  
 American Economy examines the economics behavioral science sociology history institutions law and regulation of consumer  
 credit in the United States After discussing the origins and various kinds of consumer credit available in today s marketplace  
 this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow  
 consumer credit has risen too fast for too long It then turns to demand and supply with chapters discussing neoclassical  
 theories of demand new behavioral economics and evidence on production costs and why consumer credit might seem  
 expensive compared to some other kinds of credit like government finance This discussion includes review of the economics  
 of risk management and funding sources as well discussion of the economic theory of why some people might be limited in  
 their credit search the phenomenon of credit rationing This examination includes review of issues of risk management  
 through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for  
 offerings of consumer credit The book then discusses technological change in credit granting It examines how modern  
 automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of  
 information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the  
 logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services  
 worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom  
 mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to  
 legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main  
 thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on  
 state regulation that has long focused on marketplace access and pricing Before a final concluding chapter another chapter  
 focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including  
 credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is  
 a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full

review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today

Economic and Financial Challenges for Balkan and Eastern European Countries Marietta Janowicz-Lomott, Krzysztof Łyskawa, Persefoni Polychronidou, Anastasios Karasavoglou, 2020-04-27 This proceedings book presents selected papers from the 10th international conference on the Economies of the Balkan and Eastern European Countries in the Changing World EBEEC held in Warsaw Poland in May 2018 In addition to discussing the latest research it includes papers adopting a wide variety of theoretical approaches and empirical methodologies and covering a number of key areas such as international economics economic growth finance and banking insurance healthcare agriculture labor and energy markets innovation management and marketing In addition the authors discuss policy instruments and best practices for the region This book appeals to scholars and students in fields of economics and finance as well as practitioners interested in the development of the region

**Problems of Market Liberalism: Volume 15, Social Philosophy and Policy, Part 2** Ellen Frankel Paul, Fred D. Miller (Jr.), Jeffrey Paul, 1998-10-13 These essays assess market liberal or libertarian political theory They provide insights into the limits of government develop market oriented solutions to pressing social problems and explore some defects in traditional libertarian theory and practice Some of the essays deal with crucial theoretical issues asking whether the promotion of citizens welfare can serve as the justification for the establishment of government or inquiring into the constraints on individual behavior that exist in a liberal social order Some essays explore market liberal or libertarian positions on specific public policy issues such as affirmative action ownership of the airwaves the provision of healthcare or the regulation of food and drugs Other essays look at property rights the morality of profit making or the provision of public goods Still others address libertarianism as a political movement suggesting ways in which libertarians can reach out to those who do not share their views
