**Bulletin of the Atomic Scientists** ,1961 Human Rights Education and the Politics of Knowledge Joanne Coysh,2017-02-24 Around the world there are a myriad of NGOs using human rights education HRE as a tool of community empowerment with the firm belief that it will help people improve their lives One way of understanding these processes is that they translate universal human rights speak using messages and symbols which make them relevant to people s daily lives and culturally resonant However an alternative more radical perspective is that these processes should engage individuals in modes of critical inquiry into the ways that that existing power structures maintain the status quo and control not only how we understand and speak about social inequality and injustice but also act on it This book is a critical inquiry into the production distribution and consumption of HRE and how the discourse is constructed historically socially and politically through global institutions and local NGO practice The book begins with the premise that HRE is composed of theories of human rights and education both of which are complex and multifaceted However the book demonstrates how over time a dominant discourse of HRE constructed by the United Nations institutional framework has come to prominence and the ways it is reproduced and reinforced through the practice of intermediary NGOs engaged in HRE activities with community groups Drawing on socio legal scholarship it offers a new theoretical and political framework for addressing how human rights pedagogy knowledge and power can be analysed between the global and local by connecting the critical but

well trodden theories of human rights to insights on critical pedagogy It uses critical discourse analysis and ethnographic research to investigate the practice of NGOs engaged in HRE using contextual evidence and findings from fieldwork with NGOs and communities in Tanzania *Paperbound Books in Print* ,1992 **Bulletin of the Atomic Scientists** ,1959-09 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Energy Justice Across Borders* Gunter Bombaerts,Kirsten Jenkins,Yekeen A. **Knowledge For The Anthropocene** Carrillo, Francisco J., Koch, Günter, 2021-11-09. With human-induced environmental impacts disrupting human life in deeper ways and at a wider scale than anything previously experienced, this multidisciplinary book looks at the ways that current knowledge bases seem inadequate to help us deal with such realities. It offers a critical appraisal of the current knowledge infrastructure including science, technology, innovation, education, and informal knowledge systems.

**Reappraising J. A. Hobson (Routledge Revivals)** Michael Freeden, 2009-09-10. J. A. Hobson was one of the most influential social, economic, and political theorists of late nineteenth and early twentieth-century Britain. In this volume, first published in 1990, eight scholars reassess the importance and relevance of his work today and affirm him as a major British thinker. These original studies place Hobson in context by explaining his intellectual antecedents, Cobden, Ruskin, nineteenth-century social and psychological theories, and economic thought. The book provides an overview of the novelty and incisiveness of Hobson's contribution to British liberal theory and radical practice. Historians, economists, social and political theorists, and students of international affairs will find this an important book for a fuller understanding of early twentieth-century British progressive thought.

**Critical Praxis and the Social Imaginary for Sustainable Food Systems** Max Stephenson, Kim Niewolny, Anna Erwin, Laura Zanotti, 2024-09-26. Scholarship and high-level diplomatic reports alike, including that of the Intergovernmental Panel on Climate Change 2021, have highlighted the negative material and bodily inequities of our globalized industrial food system, one that is fuelled by a hegemonic politics of food access and availability. The effects of industrialized food systems on public health, human rights, food sovereignty, ecological sustainability for land and water, as well as for climate change, are increasingly obvious. These ongoing challenges, along with the COVID-19 pandemic, have exacerbated existing social, economic, and political inequalities and vulnerabilities and placed them in the spotlight. The crisis in Ukraine has also underscored how connected global industrialized food systems are to nation-state, geopolitical interests, international alliances, trade relations, and conflicts. The current industrialized, resource-intensive food system has persisted because of a complex set of power relations despite its continuing and deepening social, ecological, and cultural costs.
