Economists in the Cold War Alan Bollard,2023-05-31 Economists in the Cold War is an account of the economic drivers and outcomes of the Cold War told through the stories of seven international economists who were all

closely involved in theory and policy in the period 1945-73. For them the Cold War was a battle of economic ideas, a fight between central planning and market allocation, exploring economic thinking derived from the battle between Marxist and Capitalist ideologies, a fundamental difference but with many intricacies. The book recounts how economic theory advanced, how new economic tools were developed and how policies were tested. Each chapter is based on the involvement of one of the selected economists. It was a challenging but dangerous time in economics, a time of economic recovery post-war with industrial rebuilding, economic growth and rising incomes. But it was also a time of ideological warfare, nuclear rivalry, military expansion and personal conflict. The narrative is approximately chronological, ranging from the Potsdam Conference in Germany to the Pinochet Coup in Chile. The selected economists include an American, a Pole, a Hungarian, a German, a British, a Japanese and an Argentinian, all very different economists but with interconnections among them. Each chapter also features a dissenting economist who held a contrasting view and recounts the subsequent economic arguments that played out.

Business & Economics Abraham Kuyper, 2021-02-24. Kuyper on the Positive Potential of Business. In his vast treasury of writings, Abraham Kuyper addressed nearly every sphere of society, including politics, science and the arts. But his views on business and economics are often overlooked because he rarely engaged with that sphere directly. Still, his doctrine of common grace has great significance for showing how Christ is at work in the workplace. In this anthology of essays, speeches and reflections, we see Kuyper's attempts to think positively and creatively about the calling and potential of business. Included are his ideas about economic freedom, the eternal value of earthly work, stewardship and philanthropy, economic globalization, the workings of God's grace in business and the social function of money.

[Greenhouse Gas Emission \(GHG\) Reduction and Economic Structural Transformation](#) Rui Xue, Xiaojun Deng, Zhangqi Zhong, An Pan, Bao Zongke, 2025-09-22. With the continuous increase in fossil fuel consumption by industrial sectors, the world is confronted with climate change issues such as environmental pollution and ecological imbalance. Consequently, global environmental governance has become a crucial challenge that relevant stakeholders must address. From the perspective of global governance, it is essential to adhere to the commitments made in the Paris Agreement on Climate Change and implement the global greenhouse gas (GHG) reduction targets. This necessitates the collective responsibility of all regions to reduce their GHG emissions, prompting the need to accelerate the adjustment of the economic structure. However, it is important to acknowledge that participating in GHG reduction efforts can lead to economic emission reduction costs and increased uncertainties for the economic development of various countries. These factors might hinder the sustainable growth of regional economies and potentially diminish the enthusiasm of each region to engage in GHG reduction initiatives. Therefore, alongside actively responding to climate change, promoting the optimization and adjustment of regional economies has become a consensus among all countries.
