**Tort Law and Economics** Michael Faure, 2009-01-01 The central goal of this book is to provide a state of the art overview of the literature with respect to the economic analysis of tort law It sure meets the challenge offering with great expertise a comprehensive presentation of tort law in both economic and comparative perspectives The clarity of the text unusual in the law and economics literature makes the book accessible to a broad readership of economists with a limited legal background and lawyers with limited economic skills Olivier Moreteau Louisiana State University US Tort Law and Economics ed Michael Faure provides a highly useful economic overview of the most important topics of tort law The authors clearly show the main developments of the discussion examining the results of recent studies and stating their own opinions Detailed bibliographies are included The volume has to be warmly recommended to friends and foes of economic analysis who are provided with a comprehensive update in this field while also indicating areas which critics have to focus on Helmut Koziol European Centre of Tort and Insurance Law Austria This volume provides a state of the art overview of the literature on the economic analysis of tort law In sixteen chapters the specialist authors guide the reader through the often vast literature in each domain providing a balanced and comprehensive summary Particular attention is paid to the evolution of the field further refinements to economic models and relevant conclusions and lessons for the policymaker Tort Law and Economics is part of the Encyclopedia of Law and Economics and enables readers some not familiar with law and economics to obtain an insight in the relevant economic literature concerning tort law and economics This book will be of interest to lawyers and economists practitioners and academics interested in accident law tort law insurance and regulation It will also appeal to students in economic analysis of law and policymakers working on prevention of accidents tort law or compensation of accident victims [Economics of the Environment](#) Horst Siebert, 2013-03-09 The labor of nature is paid not because she does much but because she does little In proportion as she becomes niggardly in her gifts she exacts a greater price for her work Where she is munificently benefi cent she always

works gratis David Ricardo This book interprets nature and the environment as a scarce resource Whereas in the past people lived in a paradise of environmental superabundance at present environmental goods and services are no longer in ample supply The environment fulfills many functions for the economy it serves as a public consumption good as a provider of natural resources and as receptacle of waste These different functions compete with each other Releasing more pollutants into the environment reduces environmental quality and a better environmental quality implies that the environment's use as a receptacle of waste has to be restrained Consequently environmental disruption and environmental use are by nature allocation problems This is the basic message of this book *Moving to Markets in Environmental Regulation* Jody Freeman, Charles D. Kolstad, 2007 Publisher description [Economics and the Environment](#) Eban S. Goodstein, Stephen Polasky, 2017-09-25 Climate change has morphed from an environmental problem into a challenge to civilization itself As CO<sub>2</sub> levels have continued to rise the 8th Edition of this book is now more relevant than ever Retaining the approach of the original edition the newest iteration features global warming as the framing example for a comprehensive look at environmental economics Pedagogical clarity is ensured by the book's central focus on four highly focused questions How much pollution is too much Is the government up to the job How can we do better How can we resolve global issues The text also continues with a strong focus on natural resources economics and ecosystem services Updates to the book are included to address the very latest concerns standards and legislation related to environmental issues providing students with a comprehensive look at this important topic while maintaining an accessible approach that makes the material engaging and highly relevant [Environmental Law and Economics](#) Klaus Mathis, Bruce R. Huber, 2017-04-07 This anthology discusses important issues surrounding environmental law and economics and provides an in-depth analysis of its use in legislation regulation and legal adjudication from a neoclassical and behavioural law and economics perspective Environmental issues raise a vast range of legal questions to what extent is it justifiable to rely on markets and continued technological innovation especially as it relates to present exploitation of scarce resources Or is it necessary for the state to intervene Regulatory instruments are available to create and maintain a more sustainable society command and control regulations restraints Pigovian taxes emission certificates nudging policies etc If regulation in a certain legal field is necessary which policies and methods will most effectively spur sustainable consumption and production in order to protect the environment while mitigating any potential negative impact on economic development Since the related problems are often caused by scarcity of resources economic analysis of law can offer remarkable insights for their resolution Part I underlines the foundations of environmental law and economics Part II analyses the effectiveness of economic instruments and regulations in environmental law Part III is dedicated to the problems of climate change Finally Part IV focuses on tort and criminal law The twenty-one chapters in this volume deliver insights into the multifaceted debate surrounding the use of economic instruments in environmental regulation in Europe *Non-doctrinal Research Methods in Environmental Law* Paul Martin, Solange Teles

da Silva, Marcia Leuzinger, Miriam Verbeek, Andrew Lawson, 2023-09-06 This timely book explores the innovative non doctrinal methods currently being used in environmental law research Drawing on their extensive experience expert contributors provide insight into how creative approaches to research can improve understanding of law and policy leading to more effective legal protection for the environment Policy Issues in Insurance Environmental Risks and Insurance A Comparative Analysis of the Role of Insurance in the Management of Environment-Related Risks OECD, 2003-10-31 This report focuses on the role of insurance and reinsurance companies in the management of environmental risks environmental pollution risk and natural catastrophe risk in particular Applied Economic Analysis of Information and Risk Moriki Hosoe, Iltae Kim, 2020-03-25 This book examines interesting new topics in applied economics from the perspectives of the economics of information and risk two fields of economics that address the consequences of asymmetric information environmental risk and uncertainty for the nature and efficiency of interactions between individuals and organizations In the economics of information the essential task is to examine the condition of asymmetric information under which the information gap is exploited For the economics of risk it is important to investigate types of behavior including risk aversion risk sharing and risk prevention and to reexamine the classical expected utility approach and the relationships among several types of the changes in risk Few books have ever analyzed topics in applied economics with regard to information and risk This book provides a comprehensive collection of applied analyses while also revisiting certain basic concepts in the economics of information and risk The book consists of two parts In Part I several aspects of applied economics are investigated including public policy labor economics and political economics from the standpoint of the economics of asymmetric information First several basic frameworks of the incentive mechanism with regard to transaction specific investment are assessed then various tools for market design and organization design are explored In Part II mathematical measures of risk and risk aversion are examined in more detail and readers are introduced to stochastic selection rules governing choice behavior under uncertainty Several types of change in the random variable for the cumulative distribution function CDF and probability distribution function PDF are discussed In closing the part investigates the comparative static results of these changes in CDF or PDF on the general decision model incorporating uncertain situations in applied economics **Economics and Regulation in China** Michael Faure, Guangdong Xu, 2013-10-15 This book from a top international group of scholars explores the ways in which economic tools can be used to improve the quality of regulation in general and legislative tools in particular As the role of law becomes increasingly important in China the question arises of how effective regulatory and legislative tools can be developed to accompany the Chinese evolution towards a welfare state China therefore provides a unique case study for scholars and policymakers interested in examining how regulation can play a role in promoting sustainable development Economics and Regulation in China goes beyond traditional economic analysis of law by focusing specifically on the question of how economic tools can guide the quality of legislation To this end the book

centres in on three areas regulation as a tool of economic growth competition policy and environmental policy Not only are these three domains of great importance for China but they are also relevant for a broad scholarship interested in the economic analysis of law This volume contributes to discussions on how ex ante evaluation of legislative proposals and ex post analysis can increase the effectiveness and efficiency of regulation using economic tools offering insights that go beyond the particular case of China The analysis offered by this book makes it an invaluable resource for academics and policymakers alike

Environmental Economics Alfred Endres, 2011 How can we design environmental policy that achieves ambitious ecological goals without burdening society with excessive costs How can effective international agreements for example on global warming be designed This textbook discusses issues such as these in an intelligible manner for students The book uses little mathematical analysis relying on verbal and graphical analysis

*Environmental Problem-Solving: Balancing Science and Politics Using Consensus Building Tools* Lawrence Susskind, Bruno Verdini, Jessica Gordon, Yasmin Zaerpoor, 2020-10-31 Environmental Problem Solving presents short excerpts from carefully selected readings expert commentaries on those readings assignments and the best MIT student responses to the assignments and exam questions with excellent student response The book presents four main models of environmental policy making competing theories of environmental ethics tools for environmental assessment and environmental decision making and techniques for public engagement and group decision making The book covers the material presented in the semester long course required of all students enrolled in MIT's Environmental Policy and Planning Specialization

*Economy & Ecology: Towards Sustainable Development* F. Archibugi, Peter Nijkamp, 2013-03-09 After a period of relative silence recent years have been marked by an upswing of interest in environmental issues The publication of the report of the World Commission on Environment and Development on Our Common Future 1987 has acted as a catalyst for a revival of the environmental awareness not only regarding local and daily pollution problems but also and in particular regarding global environmental decay and threats to a sustainable development In a recent study by W M Stigliani et al on Future Environments for Europe Executive Rep rt 15 IIASA Laxenburg 1989 the environmental implications of various alternative socioeconomic development pathways with respect to eleven environmental issues that could become major problems in the future are analysed These issues include Managing water resources in an era of climate change Acidification of soils and lakes in Europe Long term forestry management and the possibility of a future shortfall in wood supply Areas of Europe marginalized by mainstream economic and agricultural development Sea level rise Chemical pollution of coastal waters Toxic materials buildup and the potential for chemical time bombs Non point source emissions of potentially toxic substances Transportation growth versus air quality Decreasing multi functionally of land owing to urban and suburban land development Increasing summer demand for electricity and the impact on air quality
