C. Bose, 2022-05-10

Economics is the strangest and most dubious as also frustrating animal of social sciences and humanities The debate on what it is and what its strengths and weaknesses are in understanding and changing the economy and society for the better is never ending This book cuts through this noise for econ undergrads with social concerns It is crafted to be stuffed with peripatetic hops skips and intellectual and emotional jumps about the nature and character of the brain circuits of economics in terms of its methodological political sociological anthropological historical feminist ethical ecological spiritual literary technical corporate and other underpinnings Diverse stories are told as alerts or nudges for the undergrads who as aspirant youth have in general hyperbolic discounting attitude towards social change The mind and heart of the undergrad reading this book will hopefully be ignited so as to endeavour to find out the purpose of economic education and how economics should be learnt in order to rectify the failures of our current socio economic system The seriously academic undergrad may also be inspired to pursue the long range objective of doing integrated studies and research for maximised understanding and holistic policy making which is of course easier to say than do World Agricultural Economics and Rural Sociology Abstracts ,2000 **The Coherence of EU Regional Policy** John Bachtler, Ivan Turok, 2013-12-16 This book brings together

a rich selection of up to date practical experience of EU regional policy from across Europe It provides different perspectives on the design and operation of regional development strategies under the Structural Funds from people closely involved in studying managing or advising on the process at EU national and regional levels It therefore offers a more comprehensive and detailed understanding of the structural policies than has been available hitherto This will prove particularly useful to researchers practitioners and students interested in European regional policies and processes **Planning for**

The 1976 Economic Report of the President United States. Congress. Joint Economic Committee, 1976

The Cultural Contradictions of Progressive Politics Donald L. Rosdil, 2012-09-10 Why do some U S cities like Seattle and Boston impose social exactions and sustainability targets on private investment while others like Las Vegas and Houston offer property tax and fee remissions to business tolerate environmentally hazardous activities such as oil drilling and express skepticism even about recycling mandates The behavior of the former cities appears especially puzzling in view of globalization processes that seemingly offer many more options to mobile capital and expose cities vulnerability to private investment decisions Cultural Contradictions examines the paradoxical finding that some U S cities can impose burdensome regulations and extract social and environmental contributions from the private sector despite an apparently weak bargaining position It uses cultural change and the growth of non traditional subcultures to explain why cities adopt these progressive policies Responding to the urban policy literature's tendency to prioritize economic considerations over other kinds of causal factors the book demonstrates the joint impact of culture and economics in encouraging policy outcomes which emphasize social justice human rights and environmental sustainability in large U S cities The book makes several specific contributions to urban literature First it argues that cities in which nontraditional cultural beliefs and practices thrive and which are strongly linked to dynamic economic sectors such as information services professional scientific and technical services financial services and education and health care services are especially likely to adopt progressive policies It establishes this claim using both statistical analysis of large N city samples and a closer investigation of four case studies Second it reveals how progressive policies are a plausible response to psychological concerns associated with unconventional ways of life and the nature of postindustrial society Finally the book indicates how these new ways of life and postindustrial economic sectors grow in mutually reinforcing ways in order to make these policies acceptable to local economic elites and therefore favorable to the city's future development
