Fisher, 1983 This 1984 book proposes a general model of economic analysis based upon disequilibrium How Markets Work Israel M. Kirzner, 1997 **Chinese Economy in Disequilibrium** Yining Li, 2013-11-25 Known internationally as Mr Shareholding economist Li Yining has had a transformative impact on China's economic transition most notably as an early advocate of ownership reform and in his promotion of shareholding theory By examining the interrelationship between the government enterprises and the market Chinese Economy in Disequilibrium presents an in depth discussion on the issues of resource allocation industrial structure institutional innovation and economic fluctuation in the current Chinese economy under the condition of disequilibrium Credited with developing the theory of economic disequilibrium Professor Li distinguishes two types of disequilibrium on the basis of whether or not the majority of firms in the economy are viable profit makers In Chinese Economy in Disequilibrium Professor Li points out that not only has China's economy been in a state of disequilibrium but it also has issues with enterprises not being under budget constraint Given the limitations of market regulation under economic disequilibrium Professor Li advocates the reform of the enterprise system and upholds the government's leading role in the establishment of order in the socialist commodity economy A number of measures are also proposed with the aim of facilitating the transition of China's economy from disequilibrium to equilibrium The central theme is that the reform and transition are means to serve economic growth and social development which would eventually benefit the ordinary citizens in society Yining Li is a Professor of Economics and Emeritus Dean of Peking University's Guanghua School of Management He is one of China's foremost economists and the author of twenty books and numerous articles on a wide range of economic subjects including reform and development in China He has received a number of prestigious awards and honours for his research As the leading proponent of a market economy in China Professor Li has had a tremendous influence on China's economic reform policy over the last three decades He has served on the Standing Committee of the National People's Congress of China and is currently Vice Chairman of the Economic Committee of the Chinese People's Political Consultative Conference Equilibrium and Disequilibrium Michael Allingham, 1973 Monograph on general equilibrium econometrics discussing relevant economic theory and proposing appropriate economic models includes references Disequilibrium Economics Joost Van Doorn, Jacobus Adrianus Antonius

Doorn,1975      **Towards Operational Disequilibrium Macro Economics** J.C. Siebrand,2013-04-17 Most recent contributions to disequilibrium theory have a high level of abstraction Empirical studies explicitly based on disequilibrium are still relatively scarce However empirical macro economics anticipated the theoretical development and amalgamated classical and Keynesian elements often without a clear cut formal base Now a theoretical integration of neo classical and neo Keynesian economics seems under way There is a renewed interest in the micro economic foundations of macroeconomics with a special focus on the behaviour of economic agents operating in non clearing markets In some instances these theoretical developments offer an ex post justification for empirical macro economic practices Generally however they call for new ways of empirical macro economic model building This study operates on the border line between empirical macro economics and theoretical disequilibrium macro economic theory Our interest in macro economic disequilibrium originates from the empirical side Foreign trade relations for several countries revealed significant pressure of demand effects Hence the spillover of excess demand in domestic markets to foreign markets seemed a rather general phenomenon This fact could be explained by a theory that states that actual demand for products from domestic firms will generally and systematically differ from the ex ante demand as suggested by equilibrium analysis This latter demand concept comes close to Clower's notional demand and Patinkin's potential demand      *Equilibrium and Disequilibrium in Economic Theory*,1977      Topics in Disequilibrium Economics Steinar Strom,Lars Werin,1978-06-17      **Economics ,      Disequilibrium Trade Theories** Motoshige Itoh,Takashi Negishi,2001 Two of Japan's leading economists Motoshige Itoh and Takashi Negishi look at trade models in a disequilibrium context      **The Econometrics of Disequilibrium Models** Vijay Kumar Lal Srivastava,B. Bhaskara Rao,1990-09-25 This work is an accessible examination of the nature of various estimation methods written for those who have limited knowledge of economic theory Some of the relatively simple methods can be implemented by using existing software packages It reviews the Walrasian general equilibrium theory compares the two genuine alternative frameworks for analyzing economic phenomena and aids in establishing a necessary methodological consistency between analytical philosophy and the estimation methods in applied work on disequilibrium economics      **Disequilibrium Economics** Tõnu Puu,2018-04-02 This book discusses mathematical models for various applications in economics with a focus on non linear dynamics Based on the author's over 50 years of active work in the field the book has been inspired by models from the period between 1920 and 1950 Following a brief introduction to economics for mathematicians and other modelers it assembles a repository of useful specific functions for global dynamic modeling Furthermore twelve research stubs outlined research agendas that have not yet been fully worked on are suggested for further study and could even be expanded to entire research projects The book is a valuable resource particularly for young scientists who are skilled in mathematical and computational techniques and are looking for applications in economics      *Equilibrium and Disequilibrium in Economic Theory* G. Schwödiauer,2012-12-06 This volume is the result of a conference held at the Institute

for Advanced Studies Vienna There is still a gap reflected both in fundamental methodological differences and in the style of analysis between the Walrasian and Edgeworthian tradition of general equilibrium theory and the theoretical and policy problems raised in the framework of Keynesian and post Keynesian macroeconomics The conference succeeded in bringing together economic theorists working in fields ranging from abstract problems of mathematical equilibrium analysis to applied macroeconomic theory and it is hoped that the present volume will contribute to bridging the above mentioned hiatus As organizer of the meeting and editor of its proceedings I want to thank the Institute for Advanced Studies for providing facilities and funds I am also sincerely grateful to all my colleagues from the Institute for their generous help in particular to Mrs Monika Herkner without whose assistance and organizational talent the conference would certainly not have been the success it in fact in the opinion of all participants turned out to have been Furthermore I wish to express my gratitude towards all participants in the meeting and contributors to the volume whose patient support of the whole enterprise proved indispensable To Mrs Elfriede Auracher I am deeply indebted for her skillful and effective general management of the editorial work and her invaluable assistance in compiling the indexes
