,2007 **The Business of Aspiration** Ana Andjelic,2020-10-26 The Business of Aspiration is about how consumers shifting status symbols affect business and brand strategy These changing status symbols like taste aesthetic innovation curation or environmentalism create the modern aspirational economy In the traditional economy consumers signaled their status through collecting commodities Instagram followers airline miles and busy back to back schedules By contrast in the aspirational economy consumers increasingly convey status through collecting knowledge taste micro communities and influence This new capital changes the way businesses and entire markets operate and yet the modern aspirational economy is still an under explored area in business and culture The Business of Aspiration changes that In this book marketers will find examples analyses and tools on how brands can successfully grow in the modern aspirational economy The Business of Aspiration answers questions like what is good for my brand long term how is this business decision going to impact our culture or what are the main objectives of our growth Marketers will learn to shift their brand narrative and competitive strategy to create and distribute new brand symbols and to ensure that their brand s products and services create both monetary and social value *The Wall Street Journal* ,2006 Business Periodicals Index ,2002 **The Boston Globe Index** ,2001 **Annual Index** ,2006 **The New York Times Index** ,2001 *The British National Bibliography* Arthur James Wells,2007 Environment, Technology and Economic Growth Andrew Tylecote,Jan van der Straaten,1997 At the end of the twentieth century economists and policymakers face an unprecedented dual challenge to avert ecological disaster and to relaunch economic growth in the face of mass unemployment world wide The Future of the Environment Faye Duchin,Glenn-Marie Lange,2023 This study examines the effect of technology on the environment from the perspective of economic development It argues that major changes in the use of technology must be implemented in order to avoid environmental degradation particularly in developing countries **Technological Change, Development and the Environment** Clem Tisdell,2020-02-08 Originally published in 1988 this book considers some of the major social economic and environmental questions raised by the role of new technology in development Throughout the discussions of issues like the sustainability of the development effected by new technology is supported by detailed case studies from countries such as India Australia New Zealand China Bangladesh and South Africa The Economics of Hope: Creating a Just and Sustainable Local Economy in the Shadow of a Globalized World C. Russell Beaton,David a. Beaton,2019-11-15 The Economics of Hope argues that America now faces two all consuming crises one in economics and one with the environment The manifestation of the environmental crisis is clearly the climate change issue Less obvious to some is the economic challenge which the book argues takes the form of the widely recognized rampant inequality at all levels of world society These two spheres have long been quietly at odds but pushed by increasingly dominant corporatist institutions and globalized structures the deepening crises have become life threatening for both the globe and its inhabitants The Economics of Hope describes these looming dangers tracing them not only to the dominant economic and political institutions responsible but to the general attitudes

and mindsets it calls corporatism It is now clear that the integration of economics and environment demand common coordinated solutions To avoid catastrophe in the next few decades America and the world will either solve both problems or solve neither Clearly a serious climate and inequality crisis reckoning is inevitable Left unattended the current system will crash The book concludes with an optimistic solution path resting on the notion of Localism A mindful return to less energy intensive lifestyles and economic structures offers the surest path to a sustainable and healthy environment with fulfilling social political arrangements Communities can be re emphasized in a planned and humanistic manner that bypasses the perils posed by current corporatist economics and exploitative ecological practices A resultant soft landing in the sustainable state will be far superior to anything the globalized corporate world which caused the problems in the first place can possibly achieve

Technological Change and the Environment Arnulf Gröbler, Nebojša Nakićenović, William D. Nordhaus, 2002 The 13 articles of this collection are the result of three workshops on induced technological change ITC held in 1997 1999 at the International Institute for Applied Systems Analysis in Laxenburg Austria where two of the editors teach the third teaches economics at Yale U The chapters consider topics that include the history of the ITC debate international perspectives various ITC modeling approaches evolutionary interpretation of innovation in medical history the relation of costs and performance of new technologies with carbon dioxide emission reduction and the place of ITC in the context of global climate change policy Annotation copyrighted by Book News Inc Portland OR

The Theory of Technological Change and Economic Growth Dr Stanislaw Gomulka, 2006-12-05 In this wide ranging exposition of the various economic theories of technological change Stanislaw Gomulka relates them to rates of growth experienced by different economies in both the short and the long term Analysis of countries as diverse as Japan the Soviet Union and the United Kingdom demonstrates that there is an interdependence between technological change and the institutional and cultural characteristics of different countries which can have a profound effect on their rates of growth All of the major relevant models are discussed including those of Kuznets and Phelps but throughout the emphasis is on the creation of a unified theoretical framework to help explain the impact of technological progress on both a micro and a macro scale
