

The Labor Force Participation Rate Formula

LABOR FORCE PARTICIPATION RATE = $\frac{\text{Employed} + \text{Unemployed}}{\text{Civilian Non-Institutionalized Population}}$

The diagram illustrates the formula for the Labor Force Participation Rate. On the left, the text "LABOR FORCE PARTICIPATION RATE" is written in large, bold, white letters with a black outline, set against a dark green silhouette of the United States. To the right of this text is an equals sign. Following the equals sign is the numerator, which consists of two parts: "Employed" (with a handwritten-style label above it) represented by an illustration of a woman with glasses talking on a mobile phone, and "Unemployed" (with a handwritten-style label above it) represented by an illustration of a man holding a resume. These two parts are separated by a large plus sign. Below the numerator is a horizontal line, and underneath that line is the denominator, represented by a row of 15 small, stylized human icons. Below the icons is the handwritten-style text "Civilian Non-Institutionalized Population".
