Economics Of Trade Protection:

The Economics of Trade Protection Neil Vousden, 1990-08-31 Over the past two decades there has been a gradual but fundamental change in the nature of trade protection Even as international negotiation has succeeded in reducing tariffs to low levels national governments have resorted to a range of increasingly intricate policies to protect their domestic industries from foreign competition Direct quantitative restrictions on international trade have become particularly widespread Such nontariff barriers often have very different effects from tariffs and require careful analysis in their own right This book presents a systematic overview of the modern theory of trade protection The material in the book divides naturally into four sections The first section covers trade restrictions in competitive markets the second trade restrictions and imperfect competition the third the political economy of trade protection and the fourth the theory of policy reform The presentation makes extensive use of diagrams with the more difficult mathematics included in six appendixes The Political Economy of Trade Protection Anne O. Krueger, 2007-12-01 This clear concise summary of the in depth analyses presented in *The Political Economy of American Trade Policy* examines the level form and evolution of American trade protection In case studies of trade barriers imposed during the 1980s to help the steel semiconductor automobile lumber wheat and textile and apparel industries the contributors trace the evolution of efforts to obtain protection protectionist measures and their results A chapter assessing the common themes that emerge from the studies concludes that the focus of current trade law is exclusively on the individual protection seeking industries with little regard for indirect effects on using industries or for consumers Reform could usefully take these effects into account This volume will interest policymakers business executives and anyone interested in trade policy formulation and practice *Trade Protection in the United States* Gary Clyde Hufbauer, Diane T. Berliner, Kimberly Ann Elliott, 1986 International Trade and Trade Policy Elhanan Helpman, Assaf Razin, 1991 Centering on questions of the potential optimality of some trade protection these original contributions present research at the frontier of international trade and trade policy They expand and test the new trade theory that has developed during the last decade incorporating elements of industrial organization and political economy into the study of trade structure and the formation of trade policy Essays in the first two parts take up trade policy addressing issues such as the formation of trading blocks strategic trade policy the political economy of protection growth oriented trade policies and including empirical studies of the welfare effects of quality upgrading voluntary export restrictions and import quotas Essays in the third part discuss various structural issues such as trade in services intersectoral adjustments and the advantage of early entry Elhanan Helpman and Assaf Razin are Professors of Economics at Tel Aviv University and NBER Research Associates Contents Trade Policy Theory Is Bilateralism Bad Paul R Krugman Strategic Trade Policy and Direct Foreign Investment When Are Tariffs and Quotas Equivalent James A Levinsohn Making Altruism Pay in Auction Quotas Kala Krishna On the Ineffectiveness of Made to Measure Protectionist Programs Aaron Tornell Export Subsidies and Price

The Effects of U.S. Trade Protection and Promotion Policies Robert C. Feenstra, 2008-04-15 Economists disagree on whether recent U S trade policies are harmful or helpful but they all agree that there is a new trend toward focusing on results oriented policies in specific markets and with particular trading partners These twelve essays by leading international economists explore crucial issues in U S trade policy today Topics examined include the markets for automobile and automobile parts in the United States and Japan the U S response to unfair trading practices such as dumping and the effects of industry and country specific policies Examples include high technology and agricultural industries and off shore assembly in U S border cities The volume concludes that some policies can act to both protect imports and promote exports that the threat of protectionist policies can often have effects that are as pronounced as their implementation and that regulatory policy has as great an impact on trade and investment patterns as does trade policy itself It will be of crucial interest to international trade economists policy specialists and political scientists

Strategic Trade Policy and the New International Economics Paul R. Krugman, 1986 This volume of original essays brings the practical world of trade policy and of government and business strategy together with the world of academic trade theory It focuses in particular on the impact of changes in the international trade environment and on how new developments and theory can guide our trade policy Contents New Thinking about Trade Policy Paul Krugman Sloan School of Management MIT Rationales for Strategic Trade and Industrial Policy James A Brander University of British Columbia Strategic Export Promotion A Critique Gene M Grossman Woodrow Wilson School Princeton University Government Policy and the Dynamics of International Competition in High Technology Michael Borras Laura d Andrea Tyson and John Zysman all at the University of California Berkeley What Should Trade Policy Target Barbara Spencer University of British Columbia Credit Policy and International Competition Jonathan Eaton University of Virginia Industrial Policy An Overview Geoffrey Carliner National Bureau of Economic Research

Corden, 1997-02-20. The second edition of this classic text on international economics includes three completely new chapters on the environment and trade policy, strategic trade policy, and the relationship between trade policy and the exchange rate. The first edition introduced a number of ideas into policy circles; the new edition has been shortened and substantially revised to point up the themes that have subsequently become prominent in discussions of free trade and protection. *Trade Policy and Economic Welfare* expounds the normative theory of trade policy. It includes discussion of static and dynamic arguments for protection, effects of trade policy on income distribution, monopoly, efficiency, foreign investment, and capital accumulation, protection of advanced technology industries, the choice between tariffs and subsidies as methods of protection. The chapters are self-contained to allow flexible use of the book in teaching undergraduate courses on international trade and the economics of developing countries. *Trade, Protection and Economic Policy* Alok Ray, 1972. The Political Economy of Trade Policy Robert C. Feenstra, Gene M. Grossman, Douglas A. Irwin, 1996. This collection of papers by former students and colleagues celebrates the profound impact that Jagdish Bhagwati has had on the field of international economics over the past three decades. Bhagwati, who is the Arthur Lehman Professor of Economics at Columbia University, has made pathbreaking contributions to the theory of international trade and commercial policy, including immiserizing growth, domestic distortions, economic development, and political economy. His success and influence as a teacher and mentor is widely recognized among students at both MIT and Columbia, and as founder of the *Journal of International Economics*, he has encouraged research on many questions of theoretical and policy relevance. The political economy of trade policy is Bhagwati's most recent area of interest; it is the theme of this collection, which addresses salient topics including market distortions, income distribution, and the political process of policy making. *Sections and Contributors: Market Distortions* T. N. Srinivasan, Paul A. Samuelson, Paul R. Krugman.
