Competing for Capital Kenneth P. Thomas, 2000-10-19 As corporations search for new production sites governments compete furiously using location subsidies and tax incentives to lure them Yet underwriting big business can have its costs reduction in economic efficiency shifting of tax burdens worsening of economic inequalities or environmental degradation

Competing for Capital is one of the first books to analyze competition for investment in order to suggest ways of controlling the effects of capital mobility Comparing the European Union's strict regulation of state aid to business with the virtually unregulated investment competition in the United States and Canada Kenneth P Thomas documents Europe's relative success in controlling and decreasing subsidies to business even while they rise in the United States Thomas provides an extensive history of the powers granted to the EU's governing European Commission for controlling subsidies and draws on data to show that those efforts are paying off In reviewing trends in North America he offers the first comprehensive estimate of U S subsidies to business at all levels to show that the United States is a much higher subsidizer than it portrays itself as being Thomas then suggests what we might learn from the European experience to control the effects of capital mobility not only within or between states but also globally within NAFTA and the World Trade Organization as well He concludes with policy recommendations to help promote international cooperation and cross fertilization of ways to control competition for investment

BITs by the end of 2019 Third the EU has been working to replace the BITs between its Member States and third countries extra EU BITs with its own trade agreements which are aligned with EU legislation This combined analysis of EU law and international law yields a number of interesting conclusions The book addresses a highly topical and rapidly evolving area of EU law and international investment law It is also the first book to provide a comprehensive approach to the interplay of state aid rules and EU investment policy internally and externally i e within the EU and on a global scale As such it closes an important gap in the extant literature on international and EU law

considerations First the book demonstrates that the concept of aid is a living instrument that has been applied in accordance with the main policy priorities of the European Commission Second contrary to what has been affirmed in other literature the evolution of this concept has been influenced by the broader advancement of the case law of the Court of Justice in different periods of the integration process Third the author contends that the study of the evolution of the concept of aid in light of policy and case law provides a holistic outlook valuable to the decision making process of difficult cases In this regard the book provides criteria to interpret and discuss cases including *Slooman Neptun Philip Morris and Azores* beyond the analysis traditionally adopted in this field
