Social Work Constructivist Research Mary Katherine

O'Connor, 2015-12-22 This is the first textbook to offer a clear concise articulation of the dimensions of constructivism relevant to social work practice and research Professor Rodwell recognizes the need to systematize a process of knowledge

building and presents specific techniques to accomplish that while maintaining an interpretative stance with the focus on meaning Social work students will see that their basic way of engaging clients in an assessment and problem solving process is very much in keeping with constructivist research practice In addition to delineating the philosophical assumptions of constructivism this very practical text is geared to classroom use with chapters on research design rigor data collection data analysis research oversight and presentation of results Social Work Constructivist Research is divided into four sections that together should give the reader the intellectual and practical background necessary to understand and undertake rigorous constructivist inquiry The structure of this textbook is intended to provide the reader with sufficient information to competently confront all the design implementation and reporting elements of a constructivist inquiry process At the completion of all sections readers will know how the assumptions of constructivism differ from mainstream research primarily characterized by positivism or post positivism Readers will know how rigor expectations for research methods derived from different assumptions also differ They will know how to determine the feasibility of undertaking a constructivist inquiry when and where it is possible manage an emergent design and establish the trustworthiness and authenticity dimensions of a rigorous research effort For those interested in constructivist research and its relevancy to social work this book will prove to be a necessary resource Social Work, Constructivist Research Mary K. Rodwell, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company **Under the Cover of Kindness** Leslie Margolin, 1997 In *Under the Cover of Kindness* Leslie Margolin looks at how this country's social welfare system developed and with what results From his detailed examination of social work texts primarily case histories he argues persuasively that social work disguises its own assumptions and claims to power as a way of further legitimizing its actions By attending to these case histories Margolin shows how social work entails not only the intrusion into the previously private space of the home but also the constant justification of this intervention to both clients and workers themselves as representing charitable and disinterested help This book critically assesses how social workers invent themselves as they simultaneously invent their field of knowledge Travels in the Trench Between Child Welfare Theory and Practice George Thomas, 1994 *Travels in the Trench Between Child Welfare Theory and Practice* examines how the child welfare field's rush to establish credibility and permanence through program growth during the post World War II era gave rise to a massive but fragile conglomerate unprepared to prove its merits when challenged by an increasingly dubious public Author George Thomas proposes a broad based shift from program growth to knowledge based growth in policy management education research and information technology initiatives to revitalize performance and restore public confidence in the system Thomas's book proposes to shift the leadership emphasis away from the big business flavor of child welfare and re define it into a mediator role of trusting worker and client competencies *Travels in the Trench Between Child Welfare Theory and Practice* shows how the two sides merge and concentrate on five key issues Policy Contrasts the impact of the two orientations on shaping the field's sense of

mission defining its role establishing its priorities for growth relative to size specialization and knowledge base and stimulating or reducing client adversarialism and public perceptions of chronic mission failure Management Examines how the priorities of the two orientations differ relative to preserving hierarchical authority rewarding work that exceeds mandates promoting innovation and experimentation and relying on process as distinct from client outcome accountability Education Examines how the priorities of the two orientations differ relative to relying on manpower and brain power on one right way of doing things versus doing what is legal and ethical Research Examines how the priorities of the two orientations differ relative to confirming the rightness of the field's existing knowledge base and testing it to expand its scientifically validated portion through discovery Information Technology Explores how the priorities of the two orientations differ relative to disclosing and preserving privileged communications developing common and specialized language and breaking down or protecting authority and status differentials This historical and cross sectional analysis forms a framework proposing that the field's future value in meeting the nation's child welfare needs must have a willingness to shift its commitments from problem to competency oriented theory and practice to accept a de emphasis on growth and a reduction in specialization and to redirect investments in education research and information technology According to Thomas this enables readers to revitalize practice wisdom grow the scientifically validated portion of the field's knowledge base and begin to restore public confidence in the system The book's contents are presented in interview style to enliven the material and make it more accessible to a wide audience The reader determines the sense and direction of the analysis and the appropriateness of the questions from which it flows Travels in the Trenches is intended to promote critical analysis of the link between long range vision and its impact on daily practice
