The outcomes of these behaviors can have lasting effects on both academic performance and personal development. By identifying these predictors and understanding their impacts, educators, parents and policymakers can develop targeted prevention strategies to give students the skills and knowledge to navigate the digital world. *Students Online Risk Behaviors: Psychoeducational Predictors, Outcomes and Prevention* explores the determinants and outcomes of online risk behaviors among school and university students to explain if and how different factors can influence or be influenced by students' online risk behaviors in different developmental periods.
