Canaanites, Chronologies, and Connections Susan L. Cohen, 2018-07-17 The beginning of the Middle Bronze Age MB IIA in Canaan ca 1950 1740 B C E set the stage for many of the cultural political and economic institutions that shaped the ancient Near East Particular theoretical models for the analysis of complex societies are used in this study to examine textual pictorial and archaeological evidence relating to the nature and organization of MB IIA Canaan The written and pictorial evidence pertaining to Egyptian Canaanite contact indicates a fluid relationship that changed over time in response to changing social political and economic developments in both cultures As a result Egyptian policy toward Canaan was multifaceted including approaches ranging from the use of military force to magical rites The analysis of MB IIA site distribution indicates that Canaanite settlement first developed in areas on the coast most conducive to agricultural growth It then progressed according to a dendritic pattern of organization along the east west wadi systems into the interior in response to a growing demand for resources and raw materials fueled in part by contact with Egypt and the international world of the eastern Mediterranean Chronological correlations between the Canaanite settlement systems and Middle Kingdom Egypt also indicate that the beginning of the MB IIA in Canaan dates well into the Middle Kingdom rather than being contemporary with its beginnings as previously understood Findings concerning the Canaanite Egyptian relationship Canaanite site distribution and chronological connections between these two regions all illustrate the development of Canaan from a society in the first stages of urbanization to a fully urbanized one setting the stage for the rise of the Hyksos to power in Egypt

The Exodus Peter Feinman, 2021-10-13 Did the Exodus occur This question has been asked in biblical scholarship since its origin as a modern science The desire to resolve the question scientifically was a key component in the funding of archaeological excavations in the nineteenth century Egyptian archaeologists routinely equated sites with their presumed biblical counterpart Initially it was taken for granted that the Exodus had occurred It was simply a matter of finding the archaeological data to prove it So far those results have been for naught The Exodus An Egyptian Story takes a very real world approach to understanding the Exodus It is not a story of cosmic spectacles that miraculously or

coincidentally occurred when a people prepared to leave Egypt There are no special effects in the telling of this story Instead the story is told with real people in the real world doing what real people do Peter Feinman does not rely on the biblical text and is not trying to prove that the Bible is true He places the Exodus within Egyptian history based on the Egyptian archaeological record It is a story of the rejection of the Egyptian cultural construct and defiance of Ramses II Egyptologists not biblical scholars are the guides to telling the Exodus story What would you expect Ramses II to say after he had been humiliated If there is an Egyptian smoking gun for the Exodus how would you recognize it To answer these questions requires us to take the Exodus seriously as a major event at the royal level in Egyptian history
