*The Mathematics of Egypt, Mesopotamia, China, India, and Islam* Victor J. Katz,Annette Imhausen,2007-08-05 In recent decades it has become obvious that mathematics has always been a worldwide activity But this is the first book to provide a substantial collection of English translations of key mathematical texts from the five most important ancient and medieval non Western mathematical cultures and to put them into full historical and mathematical context The Mathematics of Egypt Mesopotamia China India and Islam gives English readers a firsthand understanding and appreciation of these cultures important contributions to world mathematics The five section authors Annette Imhausen Egypt Eleanor Robson Mesopotamia Joseph Dauben China Kim Plofker India and J Lennart Berggren Islam are experts in their fields Each author has selected key texts and in many cases provided new translations The authors have also written substantial section introductions that give an overview of each mathematical culture and explanatory notes that put each selection into context This authoritative commentary allows readers to understand the sometimes unfamiliar mathematics of these civilizations and the purpose and significance of each text Addressing a critical gap in the mathematics literature in English this book is an essential resource for anyone with at least an undergraduate degree in mathematics who wants to learn about non Western

During the last hundred years scholarship has revealed the existence of two other eastern literatures which are not only as old as that of the Hebrews but very much older namely those of Egypt and Babylonia Although much of Babylonian literature is known to us mainly from the Assyrian versions found in Assurbanipal's library recent discoveries have shown that many of its best epic and lyric productions go back at least two thousand years further and have their roots in the Sumerian civilization In Egypt too religious literature is found in a highly developed state as early as the Pyramid Texts which in the form in which we have them are as old as 2500 B C and possibly go back in part to much earlier originals These discoveries make it no longer possible to regard the literature of the Hebrews as an isolated phenomenon in the ancient East and they furnish a host of new criteria which must be applied to any attempt to explain and to appraise the Old Testament from the Preface
