**A Quarter Century of Community Psychology** Tracey A. Revenson, Anthony R. D'Augelli, Sabine E. French, Diane Hughes, David E. Livert, Edward Seidman, Marybeth Shinn, Hirokazu Yoshikawa, 2011-06-27 This work contains original research from the first

25 years of the American Journal of Community Psychology selected to reflect community psychology's rich tradition of theory, empirical research, action, and innovative methods. This volume will be of interest to community mental health workers, social science and social work researchers, health care professionals, policymakers, and educators in the fields of community and preventative psychology. International Community Psychology Stephanie Reich, Manuel Riemer, Isaac Prilleltensky, Maritza Montero, 2007-07-03 Community psychology (CP) has a rich history and presence internationally that many people may not be aware of. Today's increasingly global environment encourages reviewing the world-wide goals and practices of CP. The desire to promote collective well-being clearly transcends geographical boundaries. The goal of developing a global perspective and discourse between countries has been delayed by the lack of a single accessible source for information. This book provides the first in-depth guide to global community psychology research and practice history and development theories and innovations presented in one field-defining volume. Included are contributions from countries with long histories of oppression, social movements, and political turmoil; long-time democracies and former dictatorships. Fully formed CP establishments compare with fledgling ventures into the field. The contributors document the complex relationships between CP and ideological currents, other strands of psychology, and social science, cultural, and historical traditions and economic developments. The goals of this book are several: Promote international collaboration, enhance theory utilization and development, identify biases and barriers in the field, accrue critical mass for a discipline that is often marginalized, minimize the pervasive US-centric view of the field. Practitioners and researchers will find in International Community Psychology new perspectives on the communities they serve. As a text for advanced and graduate-level courses, it depicts a robust field with a legitimate mission. When concepts of community and sometimes even of psychology may not always translate from one nation to the next, this book provides a world of needed context. **Ethical Transformations for a Sustainable Future** Deva Temple, 2017-09-29 It has become increasingly apparent that humanity's complex social, political, and economic systems are incompatible with the finite capacity of the Earth to replenish resources and absorb wastes. If the planet is to continue to be habitable for the myriad web of other creatures that make life possible, humans must transform their systems so that they are aligned with natural systems. One thing is sure: it will not be Nature's laws, the delicate interdependence that characterizes Earth's ecosystems that change. The change must begin within each person and from there permeate throughout our social, political, and economic structures. The contributors to this volume believe that such transformations are urgently needed and possible, and they offer specific examples. They suggest solutions that call for new perspectives in our ethics, beliefs, traditions, economy, business, gender relations, education, and technology. They show that human beings have the power to implement changes in all natural and social environments. The chapters in this book have been organized around three keywords: Reconnecting, Reframing, and Rethinking. The contributors argue that we need to reconnect with the Earth and nature as well as with each other and parts of ourselves that we have ignored for too long. We

need to reframe the way in which people prioritize choices in the economy the way we do business and pursue development and we need to rethink the mission of education and the roles of technology

Bel,2025-09-30 International professional neuroscience organizations granting agencies and academic institutions have pledged their commitment to enhance diversity equity and inclusion with public statements of support and promises to increase training and funding opportunities for underrepresented scientists At the same time there is growing recognition that many human neuroscience studies to date have had insufficient representation of the rich tapestry of diversity across the globe resulting in demographically skewed samples upon which significant medical protocols pharmacological dosing recommendations and governmental policies have been shaped Finally much of the inquiry and analyses of potential variance across diverse groups in the neurosciences has taken a hegemonic view with little attention to the structurally racist biased and or colonialist systems of oppression that are likely to undergird these potential variances As we move into the next decade of neuroscience research there is an urgent need to more equitably cite and include the voices of diverse cross disciplinary health equity researchers who can bring their decades long expertise to enhance our perspectives of justice equity diversity and inclusion in human neuroscience neuropharmacology computational neuroscience developmental neuroscience neurogenetics and neuroinformatic inquiries
