## **Ecological Utopias Envisioning The Sustainable Society:**

**Ecological Utopias** Marius de Geus,1999 What if anything can the ecological utopias found in the history of philosophy contribute to our present quest for ecological responsibility *Sustainable Utopias* Jennifer L. Allen,2022-03-22 Jennifer Allen details a German utopian movement that arose against capitalist triumphalism at the end of the Cold War Describing public art and history projects alongside novel community centered political institutions Allen shows how activists invited ordinary people to build a radically new society free from alienation and disenfranchisement *Utopias, Ecotopias and Green Communities* Liam Leonard,2007-01-01 Advances in Ecopolitics includes a range of publications which each discuss a significant element in the environmental theory which now represent an important aspect of sustainable living This series has now got a new title Advances in Sustainability and Environmental Justice Editorial Objectives This series provides a series of insights into real alternatives to the current economic malaise with an examination of key themes such as transition towns sustainable utopias co operative farming sustainability and activism ecofeminism green protectionism intentional communities environmental justice environmental movements green philosophies politics and green economics Topicality The series provides a series of environmental alternatives which require our fullest consideration in light of the ongoing economic downturn which has accompanied the latest incarnation of unsustainable practices It provides a forum for debate about a positive set of sustainable alternatives which set out an understanding that another world is possible Key Benefits This book series is essential reading for all academics researchers and practioners who are involved in the areas of environmentalism and it Acts as a forum for debate and enables the publication of papers which establish understanding of environmentalism and sustainability Provides a unique opportunity for the exchange of peer reviewed knowledge on the widest extent of environmental and ecological issues Allows for the establishment of working networks of environmental academics from across the globe Key Audiences This series particularly encourages academics researchers and practitioners from Europe North America and from developing nations to share their experience knowledge and practices with an international audience Contributors from across the globe that focus on issues and research which will affect and inform ecopolitical studies are welcome to submit work for consideration in the series Coverage The series encourages well written articles with the focus on interdisciplinary international and comparative standpoints on contemporary management issues Coverage includes but is not restricted to Ecological politics Sustainable development Environmental philosophy Green party politics Environmental economics Environmental movements Ecofeminism Sustainable living practices **Utopias and the Environment** Geoffrey Berry,2017-10-02 Utopias and the Environment explores the way in which the kind of dreaming or re visioning known as the utopian imaginary takes environmental concerns into account This kind of creative intervention is increasingly important in an era of ecological crisis as we witness the failure of governments worldwide to significantly change industrial civilization from a path of business as usual In this context it is up to the artists in this case authors to

imagine new ways of being that respond to this imperative and immediate global issue Concurrently it is also up to critics readers and thinkers everywhere to appraise these narratives of possibility for their complexities and internal conflicts as well as for their promise as we enter this new era of rapid change and adaptation Because creative and critical thinkers must work together towards this goal the idea of the critical utopia coined by Tom Moylan in response to the fiction of the 1970s is now ingrained in the common argot and is one of the key ideas discussed in this book This development in the genre which combines self reflexivity and multiple perspectives within its dreaming represents the postmodern spirit in its most regenerative aspect This book is testament to such hopes and potential realities This book was originally published as a special issue of Green Letters

**Anarchism and utopianism** Laurence Davis,Ruth Kinna,2024-06-04 This collection of original essays examines the relationship between anarchism and utopianism exploring the intersections and overlaps between these two fields of study and providing novel perspectives for the analysis of both The book opens with an historical and philosophical survey of the subject matter and goes on to examine antecedents of the anarchist literary utopia anti capitalism and the anarchist utopian literary imagination free love as an expression of anarchist politics and utopian desire and revolutionary practice Contributors explore the creative interchange of anarchism and utopianism in both theory and modern political practice debunk some widely held myths about the inherent utopianism of anarchy uncover the anarchistic influences active in the history of utopian thought and provide fresh perspectives on contemporary academic and activist debates about ecology alternatives to capitalism revolutionary theory and practice and the politics of art gender and sexuality Scholars in both anarchist and utopian studies have for many years acknowledged a relationship between these two areas but this is the first time that the historical and philosophical dimensions of the relationship have been investigated as a primary focus for research and its political significance given full and detailed consideration

*Environmental Ethics and International Policy* H. ten Have,2006-01-01 This publication a joint initiative of the World Commission on the Ethics of Scientific Knowledge and Technology COMEST and the UNESCO Division of Ethics of Science and Technology contains essays written by eight leading international experts in this relatively new inter disciplinary area of applied ethics These papers consider the moral dimensions of environmental management issues and explores proposals for effective international policy making to promote environmental objectives

*The Palgrave Handbook of Utopian and Dystopian Literatures* Peter Marks,Jennifer A. Wagner-Lawlor,Fátima Vieira,2022-03-15 The Palgrave Handbook of Utopian and Dystopian Literatures celebrates a literary genre already over 500 years old Specially commissioned essays from established and emerging international scholars reflect the vibrancy of utopian vision and its resiliency as idea genre and critical mode Covering politics environment geography body and mind and social organization the volume surveys current research and maps new areas of study The chapters include investigations of anarchism biopolitics and postcolonialism and study film art and literature Each essay considers central questions and key primary works evaluates the most recent research and outlines

contemporary debates Literatures of Africa Australia China Latin America and the Middle East are discussed in this global cross disciplinary and comprehensive volume *Urban Utopias* Malcolm Miles,2007-11-21 Utopia tends to generate a bad press regarded as impracticable perhaps nostalgic or contradictory when visions of a perfect world cannot accommodate the change that is necessary to a free and self organizing society But people from diverse backgrounds are currently building a new society within the old balancing literal and metaphorical utopianism and demonstrating plural possibilities for alternative futures and types of settlement Thousands of such places exist around the world including intentional communities eco villages permaculture plots religious and secular retreats co housing projects self build schemes projects for low impact housing and activist squats in urban and rural sites This experience suggests however that when planning and design are not integral to alternative social formations the modern dream to engineer a new society cannot be realized The book is structured in four parts In part one literary and theoretical utopias from the early modern period to the nineteenth century are reconsidered Part two investigates twentieth century urban utopianism and contemporary alternative settlements focusing on social and environmental issues activism and eco village living Part three looks to wider horizons in recent practices in the non affluent world and Part four reviews a range of cases from the author s visits to specific sites This is followed by a short conclusion in which a discussion of key issues is resumed This book brings together insights from literary theoretical and practical utopias drawing out the characteristics of groups and places that are part of a new society It links today s utopian experiments to historical and literary utopias and to theoretical problems in utopian thought

**William Morris's Utopianism** Owen Holland,2017-12-04 This book offers a new interpretation of William Morris s utopianism as a strategic extension of his political writing Morris s utopian writing alongside his journalism and public lectures constituted part of a sustained counter hegemonic project that intervened both into the life world of the fin de si cle socialist movement as well as the dominant literary cultures of his day Owen Holland demonstrates this by placing Morris in conversation with writers of first wave feminism nineteenth century pastoralists as well as the romance revivalists and imperialists of the 1880s In doing so he revises E P Thompson s and Miguel Abensour s argument that Morris s utopian writing should be conceived as anti political and heuristic concerned with the pedagogic education of desire rather than with the more mundane work of propaganda He shows how Morris s utopianism emerged against the grain of the now here embroiled in instrumental propagandistic polemic complicating Thompson s and Abensour s view of its anti political character Political Education in the Anthropocene Nathanaël Wallenhorst,Renaud Hétier,Jean-Philippe Pierron,Christoph Wulf,2023-10-19 This book articulates an educational theory as well as a political theory of the Anthropocene Divided into three sections it addresses educational anthropology cultures and institutions and educational recommendations in the Anthropocene Topics covered in the volume measure the impact of the idea of the Anthropocene on the type of anthropology that underlies education and on a phenomenology of relationship It links the notion of the Anthropocene with cultures and

institutions so as not to smooth out or erase the latter Finally it presents proposals and recommendations for educational practices The work advocates rethinking education as an essential component in ensuring the sustainability of human life in society by proposing to go beyond the approach of education for sustainable development or environmental education The work also brings together empirical contributions in which proposals are elaborated for programs pedagogical devices and experiments relating to the preparation of the future in the field of education This volume is of interest to researchers of the Anthropocene

**Real Green** Manuel Arias-Maldonado, 2016-03-23 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised

*Futuristic Cars and Space Bicycles* Jeremy Withers, 2020 Examining representations of cars and bicycles in American science fiction from the late nineteenth century to the present day Futuristic Cars and Space Bicycles argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity Rather the genre often scorns and ridicules the automobile and instead promotes more sustainable more benign more restrained technologies of movement such as the bicycle

**Green Utopianism** Karin Bradley, Johan Hedrén, 2014-03-21 Utopian thought and experimental approaches to societal organization have been rare in the last decades of planning and politics Instead there is a widespread belief in ecological modernization that sustainable societies can be created within the frame of the current global capitalist world order by taking small steps such as eco labeling urban densification and recycling However in the context of the current crisis in which resource depletion climate change uneven development and economic instability are seen as interlinked this belief is increasingly being questioned and alternative developmental paths sought This collection demonstrates how utopian thought can be used in a contemporary context as critique and in exploring desired futures The book includes theoretical perspectives on changing global socio environmental relationships and political struggles for alternative development paths and analyzes micro level practices in co housing alternative energy provision use of green space transportation co production of urban space peer to peer production and consumption and alternative economies It contributes research perspectives on contemporary green utopian practices and strategies combining theoretical and empirical analyses to spark discussions of possible futures

**Demystifying Sustainability** Haydn Washington, 2015-02-11 What is sustainability Much has been said about the terms sustainability and sustainable development over the last few decades but they have become buried under

academic jargon This book is one of the first that aims to demystify sustainability so that the layperson can understand the key issues questions and values involved Accessible and engaging the book examines the old sustainability of the past and looks to the future considering how economic ecological and social sustainability should be defined if we are to solve the entwined environmental economic and social crises It considers if meaningful sustainability is the same as a sustainable development based on endless growth examining the difficult but central issues of overpopulation and overconsumption that drive unsustainability The book also explores the central role played by society's worldview and ethics along with humanity's most dangerous characteristic denial Finally it looks to the future discussing the appropriate technology needed for sustainability and suggesting nine key solutions This book provides a much needed comprehensive discussion of what sustainability means for students policy makers and all those interested in a sustainable future

**Greentopia: Utopian Thought in the Anthropocene** Angela Kallhoff, Eva Liedauer, 2024-06-18 Greentopia Utopian Thought in the Anthropocene provides new ways of imagining the future interface between society and non human nature and brings into focus the possibility of a peaceful coexistence Greentopia is a mode of thought that takes us beyond mourning environmental degradation and ecological catastrophe The absence of already paved paths in the area gives space for a variety of experiments in thinking The book interprets its subject Greentopia as a method of re imagination yet also as a very concrete practice It brings together researchers from different areas to investigate environmental utopia from their respective angles The present volume is of highest interest for environmental ethicists but also of interest for anyone involved in current discourses on utopianism life in the Anthropocene environmental crises the future of agriculture and green cities

*Environment and Social Theory* John Barry, 2007-01-24 This thematic rather than theorist centred approach is an essential guide to the way in which the environment and social theory relate to one another including examinations of the works of the key theorists including Marx Mill Habermas and Adorno
