Renaissance Of Asia: Evolving Economic Relations Between South Asia And East Asia Pradumna Bickram Rana, 2012-03-14 A recent study by the Asian Development Bank notes that by 2050 Asia's per capita income would rise six fold to reach Europe's levels today one of many indications of Asia's re emergence By then Asia's share of global GDP would have doubled and it would have regained the dominant economic position it once held some 300 years ago before the industrial revolution What is less well known is that during the previous eras of globalization Asia was also regionally integrated and globally connected During the 19th and the first half of the 20th centuries Asia was divided and fragmented This unique book argues that led by the economic dynamism and re encountering between China and India we are witnessing the Renaissance of Asia As in the bygone eras Asia is integrating within itself and the global economy is intensifying now driven by market oriented production networks and economic policies Asia is starting to be re centered as trade and investment relations between South Asia and East Asia surge Asia's rise is a restoration of the past not a revolution This book is a must read for anyone interested in the economic development of Asia

The Economy of South Asia Tirthankar Roy, 2017-08-05 This book explores the historical roots of rapid economic growth in South Asia with reference to politics markets resources and the world economy Roy posits that after an initial slow period of growth between 1950 and the 1980s the region has been growing rapidly and fast catching up with the world on average levels of living Why did this turnaround happen Does it matter Is it sustainable The author answers these questions by drawing connections comparisons and parallels between the five large countries in the region India Pakistan Bangladesh Sri Lanka and Nepal It shows why despite differences in political experience between these countries similarities in resources and markets could produce similar trajectories Home to a fifth of the world's population South Asia's transformation has the power to change the world Most accounts of the process focus on individual nations but by breaking out of that mould Roy takes on the region as a whole and delivers a radical new interpretation of why the economy of South Asia is changing so fast

Development under Dualism and Digital Divide in Twenty-First

Century India Dilip Dutta, 2017-09-16 After first analysing the economic development processes of emerging Asian economies in general this book explores the development implications of India's seventy years 1947-2017 of socio-economic policy regimes. It discusses structural dualism and the digital divide which it identifies as the major socio-economic structural elements of the Indian economy along with the external forces of globalisation. Since the adoption of comprehensive economic reforms in 1991 India has been liberalising its economy due in part to the rising pressures of globalisation. However critics have argued that Indian liberalisation policy has aggravated unemployment, regional inequality and poverty and also increased India's external vulnerability. This book tests the validity of these arguments and provides readers a deeper understanding of the structural and institutional elements of the articulation of Indian society. It also examines the paradoxical political and economic effects of the information and communication ICT industry in India due to the economic disparities between the beneficiaries of the ICT windfall and those unable to reap those benefits. Lastly by investigating the integration of key traditional sectors into modern sectors the book provides policy suggestions for tackling the sectoral and segmental disarticulation that currently characterises Indian society. **Development Economics** Natalia

Bracarense, Louis-Philippe Rochon, 2022-02-27 Since the inception of development economics in the post World War II period most of its proponents have prescribed the adoption of western institutions as the path for prosperity the unequivocal solution for poverty, illiteracy, hunger, inequality and violence in the world. Seventy years of attempts or at least the pretense thereof to reproduce the western model in completely different historical and cultural contexts have proven to be no more than a mirage for most. Faced with this scenario why do economists insist on the ideas of development, convergence and emulation of the lifestyle of western countries? Is it possible to disassociate development from multidimensional instability, dependency, subordination and exploitation? Is the current social, political, ecological and economic organized destabilization observed in the western countries a model to follow? A desirable end of history? These questions raised earlier by some fellow economists have become ever more pressing in the present context of generalized instability. The book questions how ethical and professionally responsible it is for economists to continue to undiscerningly prescribe miraculous one-size-fits-all market oriented models to solve socio-economic problems everywhere. The contributors of this edited volume invite the readers to consider these questions and further similar inquiries in the future. The chapters in this book were originally published as a special issue of the journal Review of Political Economy. **Multinational Enterprises in Asian Development** Premachandra

Athukoralge, 2007-01-01 A remarkable product of analytical formulation, data disaggregation and methodological rigour. Anthony P D Costa Pacific Affairs Cross border investment is a key driver of the globalisation process and multinational enterprises a key driver of productivity growth. This new book offers a comprehensive and informed evaluation of the role of multinationals in the world's fastest growing region. The book will not only be of interest to researchers and students but also to analysts in the policy making community. David Greenaway University of Nottingham UK This volume offers a wealth of

information and insights into the roles of multinational enterprises in shaping recent economic developments in East and South Asia. These direct investments, which are now the dominant source of finance for the developing regions globally, are generally welcomed today, though this was untrue earlier. However, the cases in this volume draw out ways and contexts in which the greatest advantage may be sought from these capital inflows.

Robert E. B. Lucas, Boston University, US: Foreign direct investment by MNCs, once considered the bane of developing countries, is today a leading indicator of their relative success. The reality is more complicated, however, as this fresh assessment of the role of MNCs in Asia explains clearly and persuasively. This study is a major contribution to literature on the role of MNCs in developing countries, drawing heavily on the author's own original research on foreign direct investment in several Asian countries. What is the role of MNCs in developing countries, and how has it changed over the past two decades? What are the costs and benefits to host developing countries of MNCs' direct investment? What measures should developing countries take to attract MNCs? This book provides clear and convincing answers to these questions based on the kind of rigorous empirical analysis for which the author is renowned.

James Riedel, The Johns Hopkins University School of Advanced International Studies, US: This book takes a fresh look at unresolved issues associated with the role of multinational enterprises and foreign direct investment in economic development in light of the experiences of developing countries in Asia. Each chapter presents a self-contained treatment of a specific theme relating to the developmental implications of MNEs, encompassing the current state of the debate and relevant theory and policy implications. The key aspects of MNE development interface covered in the book include expansion of manufacturing exports, global integration through international fragmentation of production, research and development, productivity growth, susceptibility to and recovery from financial crises, macroeconomic adjustment, and international competitiveness and economic transition from plan to market.

Multinational Enterprises in Asian Development will prove a valuable reference tool for academics, researchers, and students focusing on trade, development, and international business. Professional economists and policy makers wishing to broaden their understanding of the role of MNEs as an integral part of the international development policy will also find much to interest them in this book.

Pro-Poor Macroeconomics, G. Cornia, 2006-09-29: This book tackles the disagreements that affect those looking to establish the macroeconomic policies needed to halve poverty over the next ten years. It presents a pro-poor macroeconomic policy allowing countries to recapture policy space, help promote growth, reduce inequality, and diminish poverty in a sustainable way.

The Odds Revisited, K. A. S. Murshid, 2022-11-10: This book looks at Bangladesh at and beyond its fifty years since its formation in 1971. A comprehensive, holistic narrative is constructed to track key development dynamics at the sectoral, sub-sectoral, and macro levels. This much-needed exercise dispels the notion that the Bangladesh surprise can be reduced to singular dimensions such as the trauma of the 1971 war or women's empowerment and micro credit. The mixture of economic history, political economy, and institutional and actor analysis provides fresh insights to the themes addressed. A well-argued case to view emerging

Bangladesh as the newest member of the Flying Geese club The Odds Revisited includes a detailed review of macro and sectoral developments over the last fifty years and provides new material and insights into the rise of Bangladesh's capitalist class a socio economic perspective of the role of Dhaka based urbanization and the rise of a new middle class **Apostles of Development** David C. Engerman, 2025-05-30 The battle against global poverty that began after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and development Apostles of Development examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but when it looks for what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modesty focusing on practical matters such as addressing gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read

Understanding Market Reforms J. Fanelli, G. McMahon, 2006-10-27 There has been a widespread move toward more market oriented policies and institutions across the developing and former socialist countries 31 country studies were undertaken to try to understand the divergent results of these reforms This book presents the findings of these studies synthesized on a regional and global basis **The Indian Economy Sixty Years after Independence** R. Jha, 2008-11-04 Provides a detailed analysis of the achievements and disappointments of the modern Indian economy and an exploration of the issues which are shaping India's economic future Offers a comprehensive overview of the state of India's economy in the twenty first century and is essential for postgraduates and scholars interested in this area

HIV and AIDS in South Asia Markus Haacker, Mariam Claeson, 2009-01-01 This book offers an original perspective on AIDS as a development issue in South Asia a region with a heterogeneous epidemic and estimated national HIV prevalence rates of up to 0.5 percent The analysis challenges the common perception of HIV and AIDS which has been shaped to a large extent by analysis of HIV and AIDS in other regions with much higher prevalence rates Three risks to development are associated with HIV and AIDS in South Asia the risk of escalation of concentrated epidemics the economic welfare costs and the fiscal costs

of scaling up treatment *The Indian Economic Journal* ,2007 *The Political Economy of Poverty, Equity and Growth: A Comparative Study* Deepak Lal,H. Myint,Hla Myint,1998-10-08 This wide ranging and innovative book synthesizes the findings of a major international study of the political economy of poverty equity and growth It represents an ambitious interdisciplinary attempt to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World *ASEAN Economic Bulletin* ,2006

Rural-Urban Dichotomies and Spatial Development in Asia Amitrajeet A. Batabyal,Yoshiro Higano,Peter Nijkamp,2021-07-01 This edited book brings together in one place new studies of rural urban interactions and their implications for regional growth and development in different regions within Asia Specifically the individual chapters in the book shed light on the different kinds of rural urban interactions that we witness in Asian regions particularly those that are based on migration poverty inequality education economic dependence and the flow of goods and services The book departs from the existing literature in three ways First it explicitly recognizes that different kinds of rural urban interactions have dissimilar impacts on the lives and hence on the welfare of the residents of rural and urban regions Second the book emphasizes the varied spatial and temporal dimensions of the interactions and the ways in which these dimensions influence rural and urban societies Third this book demonstrates the ways in which an understanding of the preceding two points contributes to our knowledge about economic growth and development Because Asia is the fastest growing and most dynamic continent in the world today the research delineated in the individual chapters of the book provides practical guidance concerning two salient questions First how do we effectively address the economic development challenges stemming from the interactions between alternate rural and urban regions within Asia Second how do we ensure that the policies we design to address these challenges give rise to broad based economic growth and development that is sustainable
