enterprises and entrepreneurs currently working off the books to legitimise their businesses The aim of this book is to advance a new way of answering these questions Drawing inspiration from institutional theory informal sector entrepreneurship is explained as resulting from the asymmetry between the codified laws and regulations of a society s formal institutions and the norms values and beliefs that comprise a society s informal institutions The argument is that if the norms values and beliefs of entrepreneurs i e their individual morality were wholly aligned with the codified laws and regulations i e state morality there would be no informal sector entrepreneurship However because the individual morality of entrepreneurs differs from state morality such as due to their lack of trust in government and the rule of law the result is the prevalence of informal sector entrepreneurship The greater the degree of institutional asymmetry the higher is the propensity to engage in informal sector entrepreneurship This book provides evidence to show that this is the case both at the individual and country level and then discusses how this can be overcome
