Political Arithmetic Robert William Fogel, Enid M. Fogel, Mark Guglielmo, Nathaniel Grotte, 2013-04-15 We take for granted today that the assessments measurements and forecasts of economists are crucial to the decision making of governments and businesses alike But less than a century ago that wasn't the case economists simply didn't have the necessary information or statistical tools to understand the ever more complicated modern economy With *Political Arithmetic* Nobel Prize winning economist Robert Fogel and his collaborators tell the story of economist Simon Kuznets the founding of the National Bureau of Economic Research and the creation of the concept of GNP which for the first time enabled us to measure the performance of entire economies The book weaves together the many strands of political and economic thought and historical pressures that together created the demand for more detailed economic thinking Progressive era hopes for activist government the production demands of World War I Herbert Hoover's interest in business cycles as President Harding's commerce secretary and the catastrophic economic failures of the Great Depression and shows how through trial and error measurement and analysis economists such as Kuznets rose to the occasion and in the process built a discipline whose knowledge could be put to practical use in everyday decision making The product of a lifetime of studying the workings of economies and skillfully employing the tools of economics *Political Arithmetic* is simultaneously a history of a key

period of economic thought and a testament to the power of applied ideas The Oxford Handbook of the Ethiopian Economy Fantu Cheru, Christopher Cramer, Arkebe Oqubay, 2019-01-10 From a war torn and famine plagued country at the beginning of the 1990s Ethiopia is today emerging as one of the fastest growing economies in Africa Growth in Ethiopia has surpassed that of every other sub Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years The government has set its eyes on transforming the country into a middle income country by 2025 and into a leading manufacturing hub in Africa The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development where the state plays a central role and where a successful industrialization drive has challenged the long held erroneous assumption that industrial policy will never work in poor African countries While much of the volume is focused on post 1991 economic development policy and strategy the analysis is set against the background of the long history of Ethiopia and more specifically on the Imperial period that ended in 1974 the socialist development experiment of the Derg regime between 1974 and 1991 and the policies and strategies of the current EPRDF government that assumed power in 1991 Including a range of contributions from both academic and professional standpoints this volume is a key reference work on the economy of Ethiopia Finance and Development Alberto Giovannini, 1993-03-25 Progress towards economic and monetary union in Western Europe has highlighted the importance of regional policies while events in Eastern Europe have focused attention on the role of finance in development and may lead to a substantial diversion of capital flows This volume from the Centre for Economic Policy Research addresses the relationships between growth convergence and capital market imperfections Theoretical papers shed light on the debates over the role of financial structure in economic development and the scope for government intervention to promote regional development Highly topical empirical papers examine the relationship between international lending and economic development in a historical perspective the experience of regional policies in the European Community and of financial liberalization in high growth East Asian economies and the development of financial markets in Eastern Europe

Development Studies Revisited Charles Cooper, E. V. K. Fitzgerald, 2016-04-15 First published in 1989 The Journal of Development Studies was founded 25 years ago as a professional journal for what had by then become an established sub discipline within British social science The Journal has consistently published a broad spectrum of British research on development studies a catholicity that has been reflected in the composition of the Editorial Board over the years and has always welcomed authors from the USA the European Continent and above all from the Third World Collated from the last twenty five years of the journal presented here are a collection of 20 odd papers that represent less than three per cent of articles published since 1964 **Government and the Economy** David A. Dieterle, Kathleen M. Simmons, 2014-10-14 In this non biased politically neutral compendium the authors trace the evolution of the U S government's role in the economy including the history ideas key players and court rulings that influenced its involvement Today's economic environment is in

constant flux as is the participation of governments in it Local state national and global governmental agencies have taken on new responsibilities with both positive and negative economic consequences This book looks at the changing role of American government in the economy from determining the measurements of economic health to being mindful of corporate sustainability to legislating business practices and consumer affairs This comprehensive collection of essays draws from the contributions of 25 economic scholars along with seasoned educators David A Dieterle and Kathleen C Simmons to examine economic systems and the factors that influence them The work includes summaries of important Supreme Court cases that have impacted America s economic infrastructure biographies of famous economists and descriptions of the seven key economic systems command socialism democratic socialism fascism market capitalism state capitalism transitional and welfare state

Profits from Power Frederic Chapin Lane, 1979-01-01 Of the many sources of power these essays deal with only one physical violence and the threat of violence exerted by some men over others Thus Frederic C Lane introduces his essays on profits and protection rent or the cost of protecting economic activities from the disruption of violence With the theme of protection rent Lane analyzes both particular cases such as the development of trade in the West Indies and the prosperity of sixteenth century Venice and general questions such as the role of capitalism in economic development and the economic relationships of the West to the rest of the world In prose that is always graceful and clear Lane presents his thoughts from many years of study that will be stimulating to sociologists and anthropologists as well as to economic historians

Development and Distribution Andy Sumner, 2018-07-03 Since the Second World War surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations East Asia has exceeded most regions in its achievement of convergence and much has been written on comparative industrialization and development in North East Asia Less discussed is South East Asia and the surprising and inclusive transformation several of its countries has undergone Development and Distribution focuses on South East Asia and more specifically on Malaysia Indonesia and Thailand These three nations have all undergone a major transformation in a way never anticipated from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases How did Malaysia Indonesia and Thailand achieve such a transformation and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive Given that historically it has been thought that structural transformation tends to push up inequality whilst inclusive growth necessitates static or even falling inequality this last point is particularly salient to developing countries Understanding how the transformation was possible in a relatively

small space of time the extent to which it was inclusive and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and social transformation Empirical Analysis of Entrepreneurship and Economic Growth André van Stel, 2006-06-15 The importance of entrepreneurship for achieving economic growth in contemporary economies is widely recognized both by policy makers and economists It is deeply embedded in the current European policy approach that the creativity and independence of entrepreneurs contribute to higher levels of economic activity Indeed according to the European Commission 2003 p 9 The challenge for the European Union is to identify the key factors for building a climate in which entrepreneurial initiative and business activities can thrive Policy measures should seek to boost the Union's levels of entrepreneurship adopting the most appropriate approach for producing more entrepreneurs and for getting more firms to grow Audretsch 2003 p 5 states that Entrepreneurship has become the engine of economic and social development throughout the world The relation between entrepreneurship and economic growth is embedded in several strands of the economic literature A first strand of literature involves the general understanding of the role of entrepreneurship in the modern economy Seminal contributions were made by Schumpeter 1934 Knight 1921 and Kirzner 1973 These economists stress different aspects of the role of the entrepreneur While Schumpeter stresses the innovating aspect Knight stresses the risk assuming aspect Kirzner finally stresses the role of the entrepreneur in leading markets to equilibrium Acs 1992 discusses the contribution of small firms in modern economies **The Elgar Companion to Development Studies** David Clark, 2006 If handbooks can be inspiring this is it Like a true companion it takes in its stride conversations both big and small Its entries do not just present an international and multidisciplinary mix but true to life they work on several different scales And importantly the book makes its authority evident For it is like an extended website but with all the added advantages of an encyclopaedia that actually tells you about the authors and the sources on which they have drawn The resulting compilation is highly intelligent thoughtful and above all usable Dame Marilyn Strathern University of Cambridge UK The Elgar Companion to Development Studies is a major production in the development studies field authored by a star studded cast of contributors With 136 entries covering a vast range of topics it should quickly establish itself as a leading work of reference We should all feel indebted to David Clark who has successfully brought this substantial publishing project to completion John Toye University of Oxford UK This is a most comprehensive handbook on development studies It brings together a wide varied array of carefully crafted summaries of 136 key topics in development by an international cast of well respected academics and other experts in respective areas of study The handbook is heavily interdisciplinary organically combining economic political historical social cultural institutional ethical and human aspects of development While the wide range of entries might appear as a simple glossary listing or an encyclopedic collection each of the 136 entries offers more depth and discussion than the average handbook Viewed in this light this companion is highly likely to become known as a leading reference work on the topic Highly recommended Ismael

Hossein Zadeh Choice The Elgar Companion to Development Studies is an innovative and unique reference book that includes original contributions covering development economics as well as development studies broadly defined This major new Companion brings together an international panel of experts from varying backgrounds who discuss theoretical ethical and practical issues relating to economic social cultural institutional political and human aspects of development in poor countries It also includes a selection of intellectual biographies of leading development thinkers While the Companion is organised along the lines of an encyclopaedia each of its 136 entries provide more depth and discussion than the average reference book Its entries are also extremely diverse they draw on different social science disciplines incorporate various mixes of theoretical and applied work embrace a variety of methodologies and represent different views of the world The Elgar Companion to Development Studies will therefore appeal to students scholars researchers policymakers and practitioners in the field of development as well as the interested layman Development Theory David

Delelegn Arega,2022-11-30 This book examines how increasing Africa China relations in the fields of trade development finance and investment have impacted productive capacities and structural economic transformation in sub Saharan Africa SSA The book argues that statistical and empirical evidence shows that China s influence has not substantially altered the fundamentals in Africa and instead outlines a framework of policy conclusions and recommendations to help achieve transformational growth and development Despite increased Chinese investments in transport energy communications and manufacturing sub Saharan Africa is yet to see tangible economic and development benefits according to the multidimensional Productive Capacities Index PCI External trade is dogged by the same problems as during the colonial era with primary commodities dominating exports to China and industrial or manufacturing products dominating imports thereby leaving the region exposed to external economic shocks The book considers whether there are lessons to be learned from the experience of Asian countries such as Vietnam proposing pragmatic coordinated non ideological and non confrontational policy approaches to development This book will be of interest to researchers policymakers advisors academics and practitioners with an interest in development in Africa and China s increasing role in the continent
