Hopkins, 1971 [The Economic Revolution in British West Africa](#) Allan McPhee, 1926

British Imperialism in West Africa Elinor Burns, 1927 *British Imperialism and Globalization, C. 1650-1960* Gareth Austin, 2022 Examining the domestic politics of imperial expansion these essays question the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence This volume brings together leading global economic historians to honour Patrick O'Brien's contribution to the establishment of global economic history as a coherent and respected field in the academy Inspired by O'Brien's seminal work on the British Industrial Revolution as a global phenomenon these essays expand the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence The change from the protective Atlantic empire 1650-1850 to the free trade empire of the last half of the long nineteenth century is elaborated as are the conscious efforts of the free trade empire to develop markets and market economies in Africa British domestic politics associated with the change and the continuation to the recent politics of Brexit are fascinatingly narrated and documented including the economic rationale for imperial expansion in the first instance The narrative continues to the crises of globalization caused by the world wars and the Great Depression which forced the free trade British Empire to change course Further the effects of the crises and the imperial reaction on the East African colonies and on New Zealand and Australia are examined Given current concerns about the environmental impact of economic activities it is noteworthy that this volume includes the environmental impact of globalization in India caused by the free trade policy of the British free trade empire *The Empire of Progress* D. Stephen, 2013-09-19 This much needed study of the British Empire Exhibition reveals durable persistent connections between empire and domestic society in Britain during the interwar years It demonstrates that the Exhibition was a marker of how by 1924 imperial relations were increasingly likely to be shaped by forces located on the colonial periphery

The Cambridge History of the British Empire John Holland Rose, 1929 [The Business of Decolonization](#) Sarah Stockwell, 2000-08-03 The Business of Decolonization serves to deepen our understanding of the end of the British empire too often approached as if it was a process shaped and experienced exclusively by nationalist and imperial politicians and policy makers It explores British companies' experience of and involvement in developments leading to the transfer of power in Ghana the former colony of the

Gold Coast The book demonstrates that businessmen developed strategies to cope with political change reveals the extent of their involvement in nationalist politics and highlights the contrasting responses of different companies to political and constitutional developments in the colony Drawing on an extensive range of company business association personal and official papers the book focuses primarily on company activity However it also investigates relations between British firms and the colonial state on the eve of Ghanaian independence and examines the place of British business interests in British policy

Imperial persuaders Anandi Ramamurthy, 2017-03-01 The first book to provide an historical survey of images of black people in advertising during the colonial period Analyses the various conflicting and changing ideologies of colonialism and racism in British advertising Reveals the historical and production context of many well known advertising icons as well as the specific commercial interests that various companies images projected Provides a chronological understanding of changing colonial ideologies in relation to advertising while each chapter explores images produced to sell specific products such as soap cocoa tea and tobacco

[The Oxford History of the British Empire: Historiography](#) Robin W. Winks, 1999 This volume investigates the shape and the development of scholarly and popular opinion about the British Empire over the centuries

the cambridge history of the british empire Henry Dodwell, 1929

The Oxford History of the British Empire: Volume V: Historiography Robin Winks, 1999-10-21 The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth British imperialism was a catalyst for far reaching change The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning the meaning of British imperialism for the ruled as well as for the rulers and the significance of the British Empire as a theme in world history This fifth and final volume shows how opinions have changed dramatically over the generations about the nature role and value of imperialism generally and the British Empire more specifically The distinguished team of contributors discuss the many and diverse elements which have influenced writings on the Empire the pressure of current events access to primary sources the creation of relevant university chairs the rise of nationalism in former colonies decolonization and the Cold War They demonstrate how the study of empire has evolved from a narrow focus on constitutional issues to a wide ranging enquiry about international relations the uses of power and impacts and counterimpacts between settler groups and native peoples The result is a thought provoking cultural and intellectual inquiry into how we understand the past and whether this understanding might affect the way we behave in the future

Africa's Development in Historical Perspective Emmanuel Akyeampong, Robert H. Bates, Nathan Nunn, James Robinson, 2014-08-11 Why has Africa remained persistently poor over its recorded history Has Africa always been poor What has been the nature of Africa's poverty and how do we explain its origins This volume takes a necessary interdisciplinary approach to these questions by bringing together

perspectives from archaeology linguistics history anthropology political science and economics Several contributors note that Africa s development was at par with many areas of Europe in the first millennium of the Common Era Why Africa fell behind is a key theme in this volume with insights that should inform Africa s developmental strategies **Foreign Affairs** Edmund Dene Morel, Helena Maria Swanwick, 1927 *Monetary Transitions* Karin Pallaver, 2021-11-16 This book uses money as a lens through which to analyze the social and economic impact of colonialism on African societies and institutions It is the first book to address the monetary history of the colonial period in a comprehensive way covering several areas of the continent and different periods with the ultimate aim of understanding the long term impact of colonial monetary policies on African societies While grounding an understanding of money in terms of its circulation acceptance and impact this book shows first and foremost how the monetary systems that resulted from the imposition of colonial rule on African societies were not a replacement of the old currency systems with entirely new ones but were rather the result of the convergence of different orders of value and monetary practices By putting histories of people using money at the heart of the story and connecting them to larger imperial policies the volume provides a new and fresh perspective on the history of the establishment of colonial rule in Africa This book is the result of a collaborative and interdisciplinary research project that has received funding by the Gerda Henkel Foundation The contributors are both junior and senior scholars based at universities in Europe Africa Asia and the US who are all specialists on the history of money in Africa It will appeal to an international audience of scholars and educators interested in African Studies and History Economic History Imperial and Colonial History Development Studies Monetary Studies **The Nigerian Cocoa Industry and the International Economy in the 1930s** Olisa Muojama, 2018-07-27 Periodic cycles and waves are characteristics of global capitalism The contraction in world trade during the Great Depression of the 1930s stands out as the strongest adverse shock to international trade in modern history This book uses the Nigerian cocoa industry s encounter with the world economy of the 1930s to knit together a gamut of themes ranging from the social formations of production to the forces of demand and supply and price fluctuations and stabilization as well as the protest movements against monopoly capitalism It examines the Nigerian cocoa industry within the international economy of the inter war years in order to demonstrate how the dynamics of the international capitalism of the 1930s such as the Great Depression and the fluctuations in commodity prices affected the cocoa industry and the peasant cocoa producers in colonial Nigeria It provides an interesting case study of the impact of international capitalism on the periphery economy as well as the consequences of economic dependence on the external market This book will be an indispensable resource for historians economists anthropologists and the general reader with an interest in the areas of international political economy depression economics world commodity trade and agriculture and its related industries *Japanese Shipping and Shipbuilding in the Twentieth Century* Peter Davies, 2009-12-01 Britain s foremost scholar of the international shipping industry based at the Centre for Port and Maritime History University of Liverpool here examines the

growth and development of Japan's modern shipping and shipbuilding industries across a wide range of topics through the pre-war Pacific War and post-war periods to the transfer of shipping technology the role of bulk carriers and world trade and the organization and structure of the Japanese merchant navy Prompted originally by his research into the decline of the British industries in a global context his focus inevitably turned to Japan which in the post-war years had replaced Britain as the world's largest ship operators and ship owners and remains so today
