Economics Of Audit Quality Private Incentives And The Regulation Of Audit And Non Audit Services:

The Economics of Audit Quality Benito Arrunada, 2013-11-11 This book focuses on market mechanisms which protect quality in the provision of audit services The role of public regulation is thus situated in the context defined by the presence of these safeguard mechanisms The book aims to contribute to a better understanding of these market mechanisms which helps in defining the content of rules and the function of regulatory bodies in facilitating and strengthening the protective operation of the market An analysis at a more general level is provided in the three chapters making up Part 1 In the four chapters of Part 2 on the other hand this analysis is applied to a particular problem to determine how those non audit services often provided by auditors to their audit clients should be regulated Finally Chapter 8 contains a summary of the analysis and conclusions of the work The conclusion with regard to non audit services is that their provision generates beneficial effects in terms of costs technical competence professional judgment and competition and moreover need not prejudice auditor independence or the quality of these services This assessment leads in the normative sphere to recommending a legislative policy aimed at facilitating the development and use of safeguards provided by the free action of market forces Regulation should thus aim to enable the parties audit firms self regulatory bodies and audit clients to discover through competitive market interaction both the most efficient mix of services and the corresponding quality safeguards adjusting for the costs and benefits of each possibility

Sustainable Education and Development—Clean Energy Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of clean energy Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy

intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019. However, the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3. International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019, a 23.6% decrease from 2018. This decline occurred even before the onset of the COVID-19 pandemic. Over a longer five-year moving average, average annual commitments decreased for the first time since 2008, from 17.5 billion in 2014 to 16.6 billion in 2019. Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020, small island developing States, least developed countries, and landlocked developing countries have lagged behind. It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020. The 2023 SEDRC conference, titled Sustainable Development and Education, aims to redefine the understanding of research in the continent's development and the role of researchers. The conference focusses on applied research, discussions, and its dissemination. Researchers from research institutions, academicians, postgraduate students, politicians, and industry representatives will be the primary audience for the conference proceedings.
