World Economic Outlook, April 2012 International Monetary Fund. Research Dept., 2012-04-17 The April 2012 issue of the World Economic Outlook assesses the prospects for the global economy which has gradually strengthened after a major setback during 2011 The threat of a sharp global slowdown eased with improved activity in the United States and better policies in the euro area Weak recovery will likely resume in the major advanced economies and activity will remain relatively solid in most emerging and developing economies However recent improvements are very fragile Policymakers

must calibrate policies to support growth in the near term and must implement fundamental changes to achieve healthy growth in the medium term Chapter 3 examines how policies directed at real estate markets can accelerate the improvement of household balance sheets and thus support otherwise anemic consumption Chapter 4 examines how swings in commodity prices affect commodity exporting economies many of which have experienced a decade of good growth With commodity prices unlikely to continue growing at the recent elevated pace however these economies may have to adapt their fiscal and other policies to lower potential output growth in the future

Large Countries' Development Path: Experience and Theory Yao Ouyang, 2022-03-04. This book aims to propose a unique analytical framework to find out the general successful experience for large developing countries which are defined with two main physical characters of large population and vast land. They are naturally crucial for the global development. Thirteen countries are chosen as large developing countries in this book which are China, India, Russia, Brazil, Mexico, Indonesia, South Africa, Iran, Egypt, Pakistan, Nigeria, Ethiopia, and Congo DRC. On the basis of selecting massive data, the author analyzes the performance of large countries in terms of human resources, natural resources, market size, and other factors. The book conducts the comparative study of large countries' latecomer strength transformation path and innovation strategy with the perspective of development economics. It presents a comprehensive overview about large developing countries.

Regional Economic Outlook, October 2011, Sub-Saharan Africa International Monetary Fund, African Dept., 2011-10-26. This year looks set to be another encouraging one for most sub-Saharan African economies. Reflecting mainly strong demand but also elevated commodity prices, the region's economy is set to expand by more than 5.1-4 percent in 2011. For 2012, the IMF staff's baseline projection is for growth to be higher at 5.3-4 percent owing to one-off boosts to production in a number of countries. There are, however, specters at the feast: the increase in global food and fuel prices amplified by drought affecting parts of the region has hit the budgets of the poor and sparked rising inflation; and hesitations in the global recovery threaten to weaken export and growth prospects. The projection for 2012 for the region is highly contingent on global economic growth being sustained at about 4 percent. A further slowing of growth in advanced economies curtailing global demand would generate significant headwinds for the region's ongoing expansion, with more globally integrated countries likely to be most affected. Policies in the coming months need to tread a fine line between addressing the challenges that strong growth and recent exogenous shocks have engendered and warding off the adverse effects of another global downturn. In some slower-growing, mostly middle-income countries without binding financial constraints, policies should clearly remain supportive of output growth, even more so if global growth sputters. Provided the global economy experiences the currently predicted slow and steady growth, most of the region's low-income countries should focus squarely on medium-term considerations in setting fiscal policy while tightening

monetary policy wherever nonfood inflation has climbed above single digits In the event of a global downturn subject to financing constraints policies in these countries should focus on maintaining planned spending initiatives while allowing automatic stabilizers to operate on the revenue side For the region s oil exporters better terms of trade provide a good opportunity to build up policy buffers against further price volatility *Proceedings of the 2nd International Interdisciplinary Conference on Environmental Sciences and Sustainable Developments Education and Green Economy (IICESD-EGE 2022)* Femilia Zahra,Salahudin Muhidin,Norbani Che-Ha,Husnah Husnah,Mery Napitupulu,Wahyuningsih Wahyuningsih,2023-12-29 This is an open access book THE SUBJECT MATTER OF THE CONFERENCE INCLUDES THE FOLLOWING AND RELATED ISSUES Agriculture and forestry for the environment and sustainable developmentHealth for the environment and sustainable developmentEngineering science for environment and sustainable developmentEducation for the environment and sustainable developmentGreen economy entrepreneurship and good governance for sustainable development *The Effect of Business Cycles on Population Health in the Emerging Economies, Volume II* Wen-Yi Chen,Lucian-Liviu Albu,Chi Wei Su,Tsangyao Chang,Aviral Kumar Tiwari,Peng Hongfeng,2022-02-03 **Library of Congress Subject Headings** Library of Congress,2010 Library of Congress Subject Headings Library of Congress.
