Economics Of Post Communist Transition:

The Economics of Post-Communist Transition Olivier Blanchard, 1997-08-28 Transition in Central and Eastern Europe has led to a U shaped response of output a sharp decline in output followed by recovery Most of the countries of Central Europe seem now firmly on the upside most of the countries of Eastern Europe are still close to the bottom of the U an optimistic view is that they are now negotiating the turn Olivier Blanchard a distinguished economist who has worked on transition since its beginning is one of the first to present a unified analysis of the process of transition The U shaped response of output its causes and its implications are the subject of this book The text is split into four chapters The first reviews the facts the second focuses on the two basic mechanisms underlying transition reallocation and restructuring the third looks more closely at a number of issues from the interactions between restructuring and privatization to the nature of the labour market in transition the fourth chapter pulls the material together in an analytical model of transition This model is then used to discuss policy issues from the design of privatization to the role of fiscal policy in transition Transforming Post-Communist Political Economies Joan M. Nelson, 1997 The publication brings together a series of essays offering an institutional analysis of economic and social change in Central and Eastern Europe and the new independent states Available in image format hypertext HTML and as Adobe Acrobat PDF files **The Economics of Post-Communist Transition**, 1998 Post-Communist Transition Leszek Balcerowicz, 2002 The post communist transition in Europe and the former Soviet Union is one of the most important transformations in modern history Changes were exceptionally large and it was not only political and economic systems which were affected there were changes in social structures new territorial boundaries in some cases had to be established and new institutions had to be constructed Moreover market oriented reforms were introduced under democratic regimes Leszek Balcerowicz President of the National Bank of Poland and former Deputy Prime Minister of Poland one of the leading reformers in eastern Europe discusses the varying outcomes of transitions in different countries showing that it was policies more than initial conditions which produced the differences He argues that the larger the scope of market oriented reforms the better the performance in terms of growth low inflation and environmental improvement The presence of competent and determined reformers has also been a crucial factor in successful transformations **Perspectives on political economy of post-communist transition** Bogomir Kovač, 1996

Highway and Byways János Kornai, 1995 Hungarian economist Janos Kornai first used the metaphor of a single path to postsocialist transition in his earlier book The Road to a Free Economy The new metaphor that frames this collection of eight recent studies reflects a broader perspective and understanding of the complexities of transition every highway and byway leads eventually to capitalism Kornai observes but to what kind how fast and at what cost Who wins and who loses Kornai draws from his experiences of Hungarian reform as well as from countries of the former Soviet Union to make several major points The first three studies describe what went wrong in countries that tried to mix elements of planned and market

economies Efforts made by communist countries to introduce market socialism the middle road contained an inherent contradiction between the logic of socialism and the logic of a free enterprise system and were doomed to failure In the studies that follow Kornai analyzes the on going dilemmas The transition from communism to free enterprise is filled with daunting hurdles it requires no less than redefining ownership changing values concerning the distribution of wealth transferring the control of political power creating financial institutions and enforcing financial discipline and making deep economic sacrifice Kornai closes with an overall survey of postsocialist transition describing the stages that countries tend to go through that will be particularly useful to scholars of comparative economic systems *Theorizing Transition* John Pickles,Adrian Smith,2005-08-31 Examining transformations using a variety of perspectives *Theorizing Transition* provides both a rich empirical map of the dimensions of post Communism and raises important theoretical issues about how we interpret these changes *The World Economy and Great Post-communist Change* Grzegorz W. Kołodko,2006 An answer for the economist is a question for a policy maker Most economists are confronted daily with the practical question of how the world is organised and how the global economy performs When economists conclude they can grasp certain aspects scientifically they offer an answer which becomes in turn a question to the policy makers keen on changing the world for the better The unique approach presented in the book is the combination of the theoretical considerations with the policy viewpoint analysis due to the author s own experience with policy making as deputy premier and finance minister of Poland twice and very successful as an architect of Polish reforms Another important feature is a vast yet comprehensive and deep discussion of the interactions between technology change and society and the economy both in the world economy and in emerging markets especially the post communist ones Of great importance for sustained development are the institutions They are not only created and built but also need to be learnt Not only theoretical arguments but also the practical experience demonstrates that faster economic growth is attained by those countries which take greater care to foster the institutional reinforcement of market economy and civic society Yet progress in market economy institution building is not in itself sufficient to ensure durable and fast growth Another indispensable component is an appropriately designed and implemented economic policy which must not confuse the means with the aims **Necroeconomics** Vladimir Papava,Vladimir Georgievich Papava,2005 *Necroeconomics and post communist transformation of economy the political economy of post communist capitalism lessons from Georgia* Vladimir Papava c2005 **Ethical Implications of Post-communist Transition Economics and Politics in Europe** Bruno S. Sergi,William T. Bagatelas,2005 **Czech Republic's Economic Transformation** Ryan Solcz,2012-05-16 Research Paper undergraduate from the year 2011 in the subject Economics History grade A University of Toronto language English abstract The paper s organization is as follows First we discuss what we mean by transition big bang and gradual and we clear up the discrepancy in the literature regarding whether or not the Czech experience adhered to big bang or gradualism it used both in fact Second we discuss the

inefficiencies in the Czech experience employment strategy and finances which showed up in the gradual phases of transition Third we discuss the Czech Republic's reaction to these inefficiencies Fourth we analyze the significance of setting Fifth we conclude by comparing the Czech experience to other post communist countries and by discussing what comes next **A**
