The Medieval Mediterranean has established itself as the main forum for studies exploring all aspects of the Mediterranean world during a period of 1000 years. In the medieval period the Mediterranean experienced a multiplicity of developments in social, political, and economic structures and in populations, religions, and cultures. The centuries between the Late Roman world of the fourth and fifth century and the early modern Braudelian Mediterranean of the sixteenth century were characterised by sweeping changes including the establishment of post-Roman kingdoms in the west, the emergence of Slav societies in the Balkans, the struggle between Christians and Muslims in Spain, and the movement of crusaders. Founded in 1993, The Medieval Mediterranean series reflects the complexity of this period with a wide variety of high-quality scholarly works from broad surveys to diachronic studies of particular areas or cities, investigations of individual themes or issues, conference proceedings, text editions, and fully annotated translations. Top specialists in a range of fields have contributed to the series, and the volumes which have appeared so far have been warmly welcomed by reviewers. This series is indispensable for readers with interests in the history of later antiquity, the Middle Ages, Byzantium, Islam, the Balkans, and the Black Sea area.

**Publication schedule:** At present, 3 volumes of around 350 pages each are published in the series each year. The vast majority of the books in the series are in the English language, although works of outstanding quality in French or German may also be included. Volumes contain illustrations and maps where appropriate.

*The Italian Cotton Industry in the Later Middle Ages, 1100-1600* Maureen Fennell Mazzaoui, 1981-07-09. This book traces the dynamic advances in textile technology and changes in the structure of demand that accompanied the rise in the late Middle Ages of an Italian industry geared to mass production of cotton fabrics. The Italian manufacture, based on borrowed techniques and imitations of Islamic cloth, was the earliest large-scale cotton industry in western Europe. It thus marked a pivotal stage in the transmission of the knowledge and use of this textile fibre from the Mediterranean basin to northern Europe. The success of the Italians in creating new markets for a wide variety of products that included pure cotton as well as mixed fabrics combining cotton with linen, hemp, wool, and silk permanently altered the patterns of taste and consumption in European society. Cotton, in various stages of proceeding, was at the heart of a complex network of communications that linked the north Italian towns to the source of raw materials and to international markets for finished goods. In the developing urban economy of northern Italy, cotton played a role comparable in magnitude to that of wool and shared with the latter certain basic features of early capitalistic organization.      **The**

**Medieval Expansion of Europe** J. R. S. Phillips, 1988 The exploits of Marco Polo and Eric the Red are well known today but less known are the many other explorers of the time and the extent of medieval European contact with other continents Between 1000 and 1500 world trade and travel flourished as never before as Europe looked for new worlds to explore and conquer This detailed introductory survey draws on a large and controversial body of evidence to chart the medieval European tradition of expansion exploring its roots in Classical ideas of the world and tracing its influence on the famous voyages of the Renaissance Phillips also provides fascinating discussion of the myths and hoaxes surrounding medieval exploration

Hendy, 2008-10-30 This is a major study of the Byzantine coinage set in the wider context of finance administration and economy The book consists of four main sections on economy and society on finance and on the circulation and production of coinage and has made an unrivalled contribution in the field of late classical Byzantine and medieval economic history

**Mortality, Trade, Money and Credit in Late Medieval England (1285-1531)** Pamela Nightingale, 2020-07-21 The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians Topics include the relative roles played by money and credit in financing the economy whether credit could compensate for shortages of coin and whether it could counteract the devastating mortality of the Black Death Drawing on a detailed analysis of the Statute Merchant and Staple records the articles chart the chronological and geographical changes in the economy from the late thirteenth to the early sixteenth centuries This period started with the triumph of English merchants over alien exporters in the early 1300s and concluded in the early 1500s with cloth exports overtaking wool in value The articles assess how these changes came about as well as the degree to which both political and economic forces altered the pattern of regional wealth and enterprise in ways which saw the northern towns decline and London rise to be the undisputed financial as well as the political capital of England

**Analytic Narratives** Robert H. Bates, Avner Greif, Margaret Levi, Jean-Laurent Rosenthal, Barry R. Weingast, 2020-07-21 Students of comparative politics have long faced a vexing dilemma how can social scientists draw broad applicable principles of political order from specific historical examples In *Analytic Narratives* five senior scholars offer a new and ambitious methodological response to this important question By employing rational choice and game theory the authors propose a way of extracting empirically testable general hypotheses

from particular cases The result is both a methodological manifesto and an applied handbook that political scientists economic historians sociologists and students of political economy will find essential In their jointly written introduction the authors frame their approach to the origins and evolution of political institutions The individual essays that follow demonstrate the concept of the analytic narrative a rational choice approach to explain political outcomes in case studies Avner Greif traces the institutional foundations of commercial expansion in twelfth century Genoa Jean Laurent Rosenthal analyzes how divergent fiscal policies affected absolutist European governments while Margaret Levi examines the transformation of nineteenth century conscription laws in France the United States and Prussia Robert Bates explores the emergence of a regulatory organization in the international coffee market Finally Barry Weingast studies the institutional foundations of democracy in the antebellum United States and its breakdown in the Civil War In the process these studies highlight the economic role of political organizations the rise and deterioration of political communities and the role of coercion especially warfare in political life The results are both empirically relevant and theoretically sophisticated Analytic Narratives is an innovative and provocative work that bridges the gap between the game theoretic and empirically driven approaches in political economy Political historians will find the use of rational choice models novel theorists will discover arguments more robust and nuanced than those derived from abstract models The book improves on earlier studies by advocating and applying a cross disciplinary approach to explain strategic decision making in history

From Hesiod to Saussure, From Hippocrates to Jevons: Volume II Jens Høyrup, 2024-05-31 This book is the second of a three volume set introducing the history of scientific thought including social and human science and covers the Latin Middle Ages the Renaissance period and the 17th century Combining general descriptions with extensive excerpts from original sources in English translation it concentrates on ways of thinking and actual argumentation and not just on results and mistakes questions of validity are primarily dealt with in the perspective of the time of the writing not on that of the 21st century The work is of great interest to historians of science and culture students as well as seasoned workers but also for amateurs willing to invest the necessary serious efforts

**The Economics of Transnational Commons** Partha Dasgupta, Karl-Göran Mäler, Alessandro Vercelli, 1997 Transnational commons cross border areas without well defined property rights have long been ignored in official development economics This volume redresses the balance by adopting an environmental approach which stresses the importance of shared natural resources and the links between acute poverty and environmental degradation The Economics of Transnational Commons draws together eminent contributors from fields as diverse as law population studies social anthropology biological sciences and economics to present authoritative accounts that combine empirical case studies with rigorous theoretical foundations Despite the multi disciplinary approach the main focus of the articles is the same that the reciprocal externalities and problems of free riding created by any common resource are complicated in the case of transnational commons by difficulties in monitoring enforcement and unequal access to

information Often using theories of negotiation taken from game theory the studies then suggest possible solutions both at an institutional and educational level In order to make these materials suitable for teaching purposes the authors have been encouraged to survey their topics rather than present their most recent findings A companion publication The Environment and Emerging Development Issues Volumes 1-11 edited by Dasgupta and Mahler deals with national environmental issues

**Altopascio** Frank McArdle, 2005-11-24 The aim of the book is to gauge the impact of the general European crisis upon a regional society and to assess the contribution of agrarian economic and social trends towards that crisis **Handbook of World Exchange Rates, 1590-1914** Markus A Denzel, 2017-03-02 As a world economy emerged from the 16th-17th centuries onwards a global cashless payment system arose This had its base in Europe first in Italy then in the rising regions of the north west with Amsterdam and then London as the central financial market The mutual quotation of exchange rates which provide the data tabulated and analysed here mark the integration into a global network of all areas with significant economic potential The primary aim of this book is to provide a compact account of the exchange rates in all these financial markets from the late 16th century up to the First World War This makes possible an instant conversion between the major world currencies at nearly any date within that period while the important introduction provides the explanation and context of developments The present handbook therefore serves as an invaluable resource for those concerned with all aspects of commercial and financial history **The Evolution of Technical Analysis** Andrew W.
