methodology for calculation of rolling load and forces acting - Aug 09 2022

in this paper we have suggested the methodology for calculation of forces acting on the gear by using theory of hot rolling in this paper the analysis process is define by comparing the power and torque available at the input and the total power and torque required for hot rolling process

calculating power parameters of rolling mill based on model - Aug 21 2023

the authors assess the feasibility of using the known formulas and analyse the impact of the front and rear tensions on the power parameters of rolling mill the problem of developing an automatic tension control system for continuous mills with multi roll groove is substantiated

pdf application of an empirical model for - Jan 14 2023

oct 1 2019 pdf mathematical models for rolling force calculation during hot rolling are crucial for both automatic mill operation and prediction of steel find read and cite all the research you need

the calculation of roll force and torque in cold strip rolling - Feb 03 2022

from an approximate theory equations are derived for roll force and torque with and without front and back tensions applied to the strip where tensions are applied the calculations for each pass take about an hour without tensions and with the use of curves given in this paper they can be carried out in ten minutes
