Evolution and Perspective ISSEP is an emerging forum for researchers and practitioners in the area of computer science  
education with a focus on secondary schools The ISSEP series started in 2005 in Klagenfurt and continued in 2006 in Vilnius  
and in 2008 in Torun The 4th ISSEP took part in Zurich This volume presents 4 of the 5 invited talks and 14 regular  
contributions chosen from 32 submissions to ISSEP 2010 The ISSEP conference series is devoted to all aspects of computer  
science teaching In the preface of the proceedings of ISSEP 2006 Roland Mittermeir wrote ISSEP aims at educating  
informatics proper by showing the beauty of the discipline hoping to create interest in a later professional career in computing  
and it will give answers different from the opinion of those who used to familiarize pupils with the basics of ICT in order to  
achieve computer literacy for the young generation This is an important message at this time when several countries have  
reduced teaching informatics to educating about current software packages that change from year to year  
The goal of ISSEP is to support teaching of the basic concepts and methods of informatics thereby making it a subject in  
secondary schools that is comparable in depth and requirements with mathematics or natural sciences As we tried to present
