Democracy Promotion and the 'Colour Revolutions' Susan Stewart, 2013-09-13 This book reviews the interplay between domestic contexts and democracy promotion efforts in selected countries of the former Soviet Union and the Western Balkans The idea behind the six case studies is twofold In the three cases where colour revolutions occurred Serbia Georgia Ukraine the authors explore the extent to which external democracy promoters adapted their strategies to respond to new domestic contexts In the other three cases Azerbaijan Belarus Russia the authors investigate how the political leadership has reacted to colour revolutions elsewhere and which consequences their reactions have had for democracy promotion In all cases an assessment of democratization processes in the country is provided as a basis for drawing conclusions about the potential for domestic and foreign actors to promote democratic development An introduction and conclusion embed the case studies in the existing literature on democracy promotion and generalize the findings across the countries studied On the practical level the volume offers suggestions for improving democracy promotion endeavours proposing in particular a more balanced approach which goes beyond supporting specific individuals and organizations to include addressing the structural level This book was published as a special issue of *Democratization*

Democratizing Finance Fred Block, Robert Hockett, 2022-02-08 What if our financial system were organized to the benefit of the many rather than simply empowering the few Robert Hockett and Fred Block argue that an entirely different financial system is both desirable and possible They outline concrete steps that could get us there Financial systems move the worlds savings from investment to investment chasing the highest rates of return They run on profit But what if investment went to the enterprises or institutions that provided things that the majority of people would prioritize Democratizing Finance includes six responses that seek to amend elaborate and challenge the arguments developed by Hockett and Block Some of the core arguments put forward by other contributors include calls for the rapid elimination of private financial entities the dilemmas

of the politics associated with financial reforms and the fate of parallel proposals advanced in the US in the 1930s

Building Democracy in Contemporary Russia Sarah L. Henderson, 2018-07-05 Can foreign donors help build new democracies In the 1990s public and private organizations such as USAID and the Soros Foundation poured huge amounts of money and expertise into Russia to help build the dream of a vibrant democratic society Sarah L Henderson argues that despite the altruistic intentions of foreign assistance agencies and domestic activists foreign aid designed to spur civic growth has had unintended consequences Drawing on extensive field work survey research and work experience for several funding agencies in Moscow in the late 1990s Henderson focuses on donor efforts to support the emerging community of nongovernmental organizations and in particular on efforts to build a functioning women's movement in Russia Her intimate knowledge of Russia's growing NGO community informs a worrisome finding foreign aid has made a tremendous difference but not in altogether expected or positive ways New Russian civic groups serve either the needs of an indigenous clientele or the demands of the foreign aid bureaucracy but rarely both Henderson's research and experience show that while aid has kept a fledgling civic community alive it is a civic community that is disconnected from its own domestic audience The book suggests that large flows of foreign aid have in some ways damaged the long term prospects for democratization in Russia

Democracy as Public Deliberation Maurizio Passerin d'Entrèves, 2002 Publisher Description Democracy in Latin America Geraldine Lievesley, 2024-07-30 This book offers an insight into the democratic processes and institutions in Latin and Central America It analyses the different political systems and the challenges to them from the Left and popular movements Lievesley questions how far democracy is embedded in Latin and Central American and asks what constitutes

citizenship in political cultures which remain highly differentiated in terms of the structures and relations of power She does this through an evaluation of the two distinct perspectives of democracy the liberal pacted and the radical participatory models Established political systems systems in transition from military to civilian rule and Socialist systems are viewed through the prism of these two models The inter relationship between state military political parties and popular movements are examined with a view to determining the possibility of the emergence of a new politics which would be inclusion rather than exclusionary and would pursue social justice The book will provide a stimulating assessment of the region s politics for undergraduates and will provoke debate for postgraduates

Democracy Challenged Marina Ottaway,2013-01-25 During the 1990s international democracy promotion efforts led to the establishment of numerous regimes that cannot be easily classified as either authoritarian or democratic They display characteristics of each in short they are semi authoritarian regimes These regimes pose a considerable challenge to U S policymakers because the superficial stability of many semi authoritarian regimes usually masks severe problems that need to be solved lest they lead to a future crisis Additionally these regimes call into question some of the ideas about democratic transitions that underpin the democracy promotion strategies of the United States and other Western countries Despite their growing importance semi authoritarian regimes have not received systematic attention Marina Ottaway examines five countries Egypt Azerbaijan Venezuela Croatia and Senegal which highlight the distinctive features of semi authoritarianism and the special challenge each poses to policymakers She explains why the dominant approach to democracy promotion isn t effective in these countries and concludes by suggesting alternative policies Marina Ottaway is senior associate and codirector of the Democracy and Rule of Law Project at the Carnegie Endowment

Research on China's Public Finance Construction Index System Peiyong Gao,Bin Zhang,Ning Wang,2017-10-09 This book employs a qualitative analysis of China s publicly financed construction sector taking the system design as its point of departure and applying comprehensive evaluation techniques to create an index system for this type of construction which in turn serves as a basis for quantitatively evaluating China s publicly financed construction sector Given the fact that China s publicly financed construction sector is a very complex field of systems engineering involving multiple subsystems as an important indicator of China s fiscal innovations since its reform and opening publicly financed construction is now shifting from theory to practice demonstrating that China has entered an era of fully publicly financed construction

The Price of Democracy Julia Cagé,2020-03-31 Why and how systems of political financing and representation in Europe and North America give outsized influence to the wealthy and undermine democracy and what we can do about it One person one vote In theory everyone in a democracy has equal power to decide elections But it s hardly news that in reality political outcomes are heavily determined by the logic of one dollar one vote We take the political power of money for granted But does it have to be this way In *The Price of Democracy* Julia Cag combines economic and historical analysis with political theory to show how profoundly our systems in North America and Europe from think tanks and the

media to election campaigns are shaped by money She proposes fundamental reforms to bring democracy back into line with its egalitarian promise Cag shows how different countries have tried to develop legislation to curb the power of private money and to develop public systems to fund campaigns and parties But these attempts have been incoherent and unsystematic She demonstrates that it is possible to learn from these experiments in the United States Europe and elsewhere to design a better system that would increase political participation and trust This would involve setting a strict cap on private donations and creating a public voucher system to give each voter an equal amount to spend in support of political parties More radically Cag argues that a significant fraction of seats in parliamentary assemblies should be set aside for representatives from disadvantaged socioeconomic groups At a time of widespread political disenchantment *The Price of Democracy* is a bracing reminder of the problems we face and an inspirational guide to the potential for reform

Democracy, Elections, and Constitutionalism in Africa Charles M. Fombad, Nico Steytler, 2021-03-18 The third wave of democracy that reached African shores at the end of the Cold War brought with it a dramatic decline from 1990 onwards in dictatorships military regimes one party governments and presidents for life Multiparty democracy was at the core of the constitutional revolutions that swept through most of Africa in those watershed years However that wave is either losing momentum or receding or being reversed in its entirety This volume examines democracy and elections in Africa a focus motivated by two concerns First after 30 years it is important to take stock of the state of constitutional democracy on the continent The democratic gains of the 1990s and 2000s seem to be falling by the wayside with the evidence mounting that regimes are concealing authoritarianism under the veneer of elections doing so in an international context where populist regimes are on the rise and free and fair multiparty elections are consequently no longer a given It is becoming a battle to protect and retain constitutional democracy The second reason for this volume's focus on democracy and elections is that multiparty democracy is essential for the proper functioning of the state in addressing the major problems facing Africa internal conflict inequality and lack of development and poor governance and corruption The focus of this volume is thus on how competitive politics or multiparty democracy can be realized and how through competition such politics could lead to better policy and practice outcomes
