The Encyclopedia of Humor Studies explores the concept of humor in history and modern society in the United States and internationally. This work's scope encompasses the humor of children, adults, and even nonhuman primates throughout the ages, from crude jokes and simple slapstick to sophisticated word play and ironic parody and satire. As an academic social history, it includes the perspectives of a wide range of disciplines, including sociology, child development, social psychology, life style history, communication, and entertainment media. Readers will develop an understanding of the importance of humor as it has developed globally throughout history and appreciate its effects on child and adult development, especially in the areas of health, creativity, social development, and imagination. This two-volume set is available in both print and electronic formats.

Charles Williams has achieved considerable reputation for his novels. He has been recognized as a brilliant theologian and a sensitive literary critic. But Williams himself wished most to be remembered as a poet and trusted his future literary reputation to the two-volume series of poems on the Arthurian theme: *Taliessin Through Logres* and *The Region of the Summer Stars*. Of the first volume, Williams wrote: "The matter and the style require and reward attention. The poems do not so much tell a story or describe a process as express states or principles of experience. The names and incidents of the Arthurian myth are taken as starting points for investigation and statement on common and profound experience. In this first full-length study of these poems, they receive in both matter and style the close attention that Williams requested. The emphasis in this study is on the quality of these poems as poetry and only secondarily upon their religious content. Although essentially

Christian they are placed within the context of the multifaceted many changing forms of recurring myths Thus they represent one of the few attempts in the twentieth century to encapsulate and age old and ever recurring pattern in the web in a brilliant structure that is thoroughly modern
