Funny How? Alex Clayton, 2020-05-01 What makes something funny This book shows how humor can be analyzed without killing the joke Alex Clayton argues that the brevity of a sketch or skit and its typical rejection of narrative development make it comedy concentrate providing a rich field for exploring how humor works Focusing on a dozen or so skits and scenes Clayton shows precisely how sketch comedy appeals to the funny bone and engages our philosophical imagination He suggests that since humor is about persuading an audience to laugh it can be understood as a form of rhetoric Through vivid highly readable analyses of individual sketches Clayton illustrates that Aristotle's three forms of appeal logos the appeal to reason ethos the appeal to communality and pathos the appeal to emotion can form the basis for illuminating the inner workings of humor Drawing on both popular and lesser known examples from the United States United Kingdom and elsewhere Monty Python's Flying Circus Key and Peele Saturday Night Live Airplane and Smack the Pony Clayton reveals the techniques and resonances of humor
