 David Levick Notes on Contributors J D Wulthorst and Anne K Haugestad Intergenerational Democracy, Environmental
 Justice and the Case of Nuclear Waste Lee Towers,Matthew Cotton,2024-10-07 This book explores the interplay between
 intergenerational justice and intragenerational justice using nuclear waste management as a consistent case to explore these
 themes Lee Towers and Matthew Cotton examine the issue of intergenerational justice from a social scientific perspective
 drawing on central case studies of nuclear waste management in Canada Finland and the United Kingdom They connect
 indigenous philosophies and notions of justice with the concept of intergenerational democracy advocating for better
 inclusion of youth and elders in decision making that affects their well being As such the book s primary objectives are
 fourfold To assess whether trade offs between intergenerational and intragenerational justice are necessary and if so what
 these trade offs are and how they might be resolved To critically assess dominant western liberal philosophical approaches
 that shape contemporary intergenerational justice thinking in policy and practice and consider alternatives drawn from
 anthropology and indigenous philosophies To assess how far our current capitalist system can achieve substantive forms of
 justice To critically examine three nuclear waste management case studies and assess how far these achieve environmental
 and energy justice and how they exemplify tensions between inter and intragenerational justice This short accessible volume
 will be of great interest to students and scholars of energy environmental justice and ethics **Enacting Environmental
 Justice through Global Citizenship** Maciej Nyka,Emma Schneider,2019-05-15 This volume was first published by Inter
 Disciplinary Press in 2014 This volume s interdisciplinary research is based on the premise that we live an unsustainable
 global lifestyle Finding ways to better inhabit our world is a challenge not only for scientists but also for civil society One
 means of achieving sustainability is through promoting Environmental Justice This volume contains both theoretical and case
 study analyses that propose methods for achieving and managing global environmental justice Creating such an
 environmental equilibrium is a difficult goal but the tools for reaching it simultaneously respond to many other challenging
 questions of the contemporary world The ideal of just sustainable development can induce efforts for solving inequity
 problems across many sectors Ethical futures: bioscience and food horizons Kate Millar,Pru Hobson West,Brigitte
 Nerlich,2023-09-04 In an ever changing interconnected world the agriculture and food system faces constant challenges in

many forms such as the impacts of climate change uncertainty surrounding the use of novel technologies and the emergence of new zoonotic diseases. Alongside these challenges, professionals working in the food system are faced with opportunities to improve food production and distribution. As decision makers attempt to balance these threats and opportunities in order to secure more sustainable production systems, the key question that arises is: What do we envisage as the future for agriculture and food production? With numerous voices advocating different and sometimes conflicting approaches ranging from organic farming to wider use of GMOs through in vitro meat production, this discussion of the future raises significant ethical questions. The contributions in this book bring together a diverse group of authors who explore a set of themes relating to the ethical dimensions of the agriculture and food futures, including the role of novel technologies, the potential issues raised by the use of biofuels, the ethics of future animal production systems, concepts of global food security, as well as chapters on food governance, priorities and educational aspects. It is intended that this volume serves as an interesting collection and acts as a source of stimulation that will contribute to wider debate and reflection on the future of the agriculture and food system.

Environmental Justice in the Anthropocene Stacia Ryder, Kathryn Powlen, Melinda Laituri, Stephanie A. Malin, Joshua Sbicca, Dimitris Stevis, 2021-06-09. Through various international case studies presented by both practitioners and scholars, *Environmental Justice in the Anthropocene* explores how an environmental justice approach is necessary for reflections on inequality in the Anthropocene and for forging societal transitions toward a more just and sustainable future. Environmental justice is a central component of sustainability politics during the Anthropocene, the current geological age in which human activity is the dominant influence on climate and the environment. Every aspect of sustainability politics requires a close analysis of equity implications, including problematizing the notion that humans as a collective are equally responsible for ushering in this new epoch. Environmental justice provides us with the tools to critically investigate the drivers and characteristics of this era and the debates over the inequitable outcomes of the Anthropocene for historically marginalized peoples. The contributors to this volume focus on a critical approach to power and issues of environmental injustice across time, space, and context, drawing from twelve national contexts: Austria, Bangladesh, Chile, China, India, Nicaragua, Hungary, Mexico, Brazil, Sweden, Tanzania, and the United States. Beyond highlighting injustices, the volume highlights forward-facing efforts at building just transitions with a goal of identifying practical steps to connect theory and movement and envision an environmentally and ecologically just future. This interdisciplinary work will be of great interest to students, scholars, and practitioners focused on conservation, environmental politics and governance, environmental and earth sciences, environmental sociology, environment and planning, environmental justice, and global sustainability and governance. It will also be of interest to social and environmental justice advocates and activists. *EPA Journal*, 1992. *The Search for Environmental Justice* Paul Martin, Sadeq Z. Bigdeli, Trevor Daya-Winterbottom, Willemien du Plessis, Amanda Kennedy, 2015-07-31. This thoughtful book provides an overview of the major developments in the theory and practice of

environmental justice It illustrates the direction of the evolution of rights of nature and exposes the diverse meanings and practical uses of the concept

Environmental Justice Kristin Shrader-Frechette, 2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population among them Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage in activism on behalf of Environmental Justice and that in a democracy it is the people not the government that are ultimately responsible for fair use of the environment

Defining Environmental Justice David Schlosberg, 2009 The book uses both environmental movements and political theory to help define what is meant by environmental and ecological justice It will be useful to anyone interested in environmental politics environmental movements and justice theory

Microfoundations of Institutions Patrick Haack, Jost Sieweke, Lauri Wessel, 2019-11-25 The notion of microfoundations has received growing interest in neo institutional theory along with an interest in microfoundational research in disciplines such as strategic management and economics

Natural Resources and Environmental Justice Sonia Graham, Anna Lukasiewicz, Stephen Dovers, Libby Robin, Jennifer McKay, Steven Schilizzi, 2017-03-01 Environmental management involves making decisions about the governance of natural resources such as water minerals or land which are inherently decisions about what is just or fair Yet there is little emphasis on justice in environmental management research or practical guidance on how to achieve fairness and equity in environmental governance and public policy This results in social dilemmas that are significant issues for government business and community agendas causing conflict between different community interests Natural Resources and Environmental Justice provides the first comprehensive interdisciplinary examination of justice research in Australian environmental management identifying best practice and current knowledge gaps With chapters written by experts in environmental and social sciences law and economics this book covers topical issues including coal seam gas desalination plants community relations in mining forestry negotiations sea level rise and animal rights It also proposes a social justice framework and an agenda for future justice research in environmental management These important environmental issues are covered from an Australian perspective and the book will be of broad use to policy makers researchers and managers in natural resource management and governance environmental law social impact and related fields both in Australia and abroad

The Justices and Injustices of Ecosystem Services Thomas Sikor, 2013-07-18 Humankind benefits from a multitude of resources and processes that are supplied by ecosystems and collectively these benefits are known as ecosystem services

Interest in this topic has grown exponentially over the last decade as biologists and economists have tried to quantify these benefits to justify management interventions Yet as this book demonstrates the implications for justice and injustice have rarely been explored and works on environmental justice are only now addressing the importance of ecosystem services The authors establish important new middle ground in arguments between conservationists and critics of market based interventions such as Payment for Ecosystem Services Neither can environmental management be separated from justice concerns as some conservationists like to believe nor is it in fundamental opposition to justice as critics like to put it The book develops this novel interpretation of justice in environmental management through analyses of prominent governance interventions and the conceptual underpinnings of the ecosystem services framework Key examples described are revenue sharing around protected areas and REDD for forest ecosystems The analyses demonstrate that interventions create opportunities for enhancing social justice yet also reveal critical design features that cause ostensibly technical interventions to generate injustices

The Oxford Handbook of Environmental and Conservation Psychology Susan D. Clayton, 2012-10-18 First handbook to integrate environmental psychology and conservation psychology *Environmental Science* Daniel Chiras, 2010 Completely updated the eighth edition of *Environmental Science* enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future
