Vanden Berg, 2010-11 Utah coal production for 2009 dropped 9.7% to 21.9 million tons mostly due to the decreased demand as a result of the world wide economic downturn In fact all of Utah coal mines except the Emery mine recorded production declines Data for this report were gathered directly from coal producers and consumers and comparisons were made to national data news and company reports and data from industry experts *Prospects for Future World Coal Trade*, 1983 Future for Coal as a Fuel and Chemical Business Communications Co, 1974 **Annual Review and Forecast of Utah Coal Production and Distribution — 2008** Michael D.
