Future Of Law Facing The Challenges Of Information Technology:

The Future of Law Richard E. Susskind, 2023 This book attempts to explain why and how information technology will radically alter the practice of law and the administration of justice The author is a leading expert on the subject of computers and the law The future of Law Richard Susskind, 1996 The Future of Law: Facing the Challenges of Information Technology: Revised Edition Richard Susskind, 1996 The Calling of Law Fiona Westwood, Karen Barton, 2016-04-01 As one of the learned professions requiring advanced learning and high principles law enjoys a special standing in society In return for its status and rank the legal profession is expected to exhibit the highest levels of honesty trust and morality the very values which underpin the legal system itself This in turn entrusts to legal education a particular problem of addressing not only the substantive elements of the body of law but a means through which the characteristics of the calling of law are imparted and instilled At a time when the very essence of the legal profession is under threat this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry character over eloquence and calling over skill Chapters are grouped around the core content and key themes of Curiosity Calling Character and Conscientiousness Contract and Culture The volume includes contributions from leading experts drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues providing insight and provoking debate **Culture and International Law** Hikmahanto Juwana, Jeffrey Thomas, Mohd Hazmi Mohd Rusli, Dhiana Puspitawati, 2019-09-03 In this era of globalization International Law plays a significant role in facing rapid development of various legal issues Cultural preservation has emerged as an important legal issue that should be considered by States This book consists of academic papers presented and discussed during the 9th International Conference of the Centre of International Law Studies 9th CILS Conference held in Malang Indonesia 23 October 2018 The title of the book represents the major theme of the conference Culture and International Law It is argued that along with globalization cultural preservation is slowly ignored by States Various papers presented in the book cover five topics cultural heritage cultural rights culture and economic activity culture and armed conflict and a general topic The authors of the papers are outstanding academics from various countries Lithuania United States of America Australia Thailand and Indonesia The conference was organized by Universitas Indonesia in collaboration with Brawijaya University This book aims to give a useful contribution to the existing literature on International Law specifically focussing on cultural issues from the perspective of cultural heritage and rights economic as well as armed conflict **Collisions in the Digital Paradigm** David John Harvey, 2017-03-23 It has been said that the only asset that a lawyer has is time But the reality is that a lawyer's greatest asset is information The practice and the business of law is all about information exchange The flow of information travels in a number of different directions during the life of a case A client communicates certain facts to a lawyer The lawyer assimilates those facts and seeks out specialised legal information which may be applicable to those facts

In the course of a generation there has been a technological revolution which represents a paradigm shift in the flow of information and communication. Collisions in the Digital Paradigm is about how the law deals with digital information technologies and some of the problems that arise when the law has to deal with issues arising in a new paradigm.

Policing and Intelligence in the Global Big Data Era, Volume I Tereza Østbø Kuldova, Helene Oppen Ingebrigtsen Gundhus, Christin Thea Wathne, 2024-10-17. Policing and Intelligence in the Global Big Data Era Volume I, the first of a two volume set, presents a rich and unique collection of global perspectives on data driven predictive technologies and the expansion and use of surveillance apparatuses in policing and intelligence, both public and private. Centered around the notion of algorithmic governance, this volume explores various practices of abstract and intelligence led policing within the context of surveillance and regulatory capitalism. Each chapter interrogates these concepts as much as realities on the ground as they play out across the globe, from Russia, USA, India, Brazil to Denmark, Germany and Norway. The volume offers a unique insight into the ways in which technologies and data driven practices, from facial recognition, predictive algorithms to generative AI, are reshaping cultures of policing, both within and beyond police proper. Particular attention is paid to the simultaneous privatization and pluralization of policing and intelligence, and to the proliferation of new intelligence actors: Academics, students and readers interested in the fields of criminology, social anthropology, critical algorithm.

Regulating Undercover Law Enforcement: The Australian Experience Brendon Murphy, 2021-03-05. This book examines the way in which undercover police investigation has come to be regulated in Australia. Drawing on documentary and doctrinal legal analysis, this book investigates how, in the space of a single decade, Australian law makers set out to regulate one of the most difficult aspects of police undercover investigation. In so doing, the Australian experience represents a paradigm model. And yet, despite its success, it is a system of law and practice that has a dark side: a model of investigation that relies heavily on activities that are unlawful in the absence of authorisation. It is a model that is as much concerned with the surveillance and control of police as it is with suspected criminal conduct. The book aims to locate the Australian experience in comparative perspective with other major common law jurisdictions: the United Kingdom, Canada and New Zealand, with a view to contrast strengths, similarities and weaknesses of these models. It is argued that the Australian model, at the pragmatic level, offers a highly successful model for regulatory structure and practice.

providing a significant model for successful regulation At the same time the model that has been introduced raises important questions about how and why the Australian experience evolved in the way that it did and the implications this has for the relationship between citizen and state the judiciary and the executive and broader questions about the protections offered by rights discourse and jurisprudence This book aims to document the law policy and practices that shape undercover investigations In so doing it aims to not only articulate the way in which the law regulates these activities but also to move on to consider some of the fundamental questions linked to undercover investigations how did regulation happen By what means of regulation What are the driving policy issues that give this field of law its particular complexion What are the implications Who gains and who loses by which means of power The book offers unique insights into a largely unknown aspect of modern covert policing identifying a range of practices the legal framework controversies and powers By locating these practices in a rich theoretical context informed by risk and governmentality scholarship this book offers a legal and theoretical explanation of one of the most controversial forms of policing

Professional Legal Ethics Donald Nicolson,Julian Webb,2000-02-03 Ethics and regulation have become catchwords of the late 1990s yet relatively little has been written about the ethical discourse and regulation of the legal professions in England and Wales This book represents the first attempt to subject the ethical discourse of the English legal professions to in depth analysis and sustained critique Drawing on insights from moral philosophy social theory the sociology of the legal profession public law theories of regulation and the extensive American literature on lawyers ethics it argues that in seeking to provide definitive answers to particular problems of professional conduct professional legal ethics has failed to deliver an approach which requires lawyers actively to engage with the ethical issues raised by legal practice Through an analysis of the core issues facing lawyers the authors locate this failure in the profession s reliance on a liberal and adversarial role morality that conceptualises the ethical values of human dignity autonomy and equality in a formalistic and narrowly legalistic manner This encourages lawyers to overlook the real invasions of these values so often wrought by upholding clients legal rights and to ignore the competing claims of affected third parties the wider community and the environment In seeking to move beyond critique the authors develop throughout the book a contextual approach to individual ethical decision making and outline a range of institutional regulatory and educational reforms which they suggest could form the basis for a more ethical brand of professionalism

Professional Legal Ethics Critical Interrogations is a wide ranging and thought provoking analysis written for lawyers ethicists and policy makers interested in this neglected area of professional ethics and regulation

Affect and Legal Education Caroline Maughan,Paul Maharg,2016-03-23 The place of emotion in legal education is rarely discussed or analysed and we do not have to seek far for the reasons The difficulty of interdisciplinary research the technicisation of legal education itself the view that affect is irrational and antithetical to core western ideals of rationality all this has made the subject of emotion in legal education invisible Yet the educational literature on emotion proves how essential it is to student learning and to the professional lives of teachers This text the first full length book study of the subject seeks to make emotion a central topic of research for legal educators and restore the power of emotion in our teaching and learning Part 1 focuses on the contribution that neuroscience can make to legal learning a theme that is carried through other chapters in the book Part 2 explores the role of emotion in the working lives of academics and clinical staff while Part 3 analyses the ways in which emotion can be used in learning and teaching The book interdisciplinary and wide ranging in its reference breaks new ground in its analysis of the educational lifeworld of situations communities actors and interactions in legal education

Forensic Computing A. J. Sammes,Brian Jenkinson,2000 The field of forensic computing is rapidly developing due to its increased importance This book covers forensic computing analysis and its capabilities of searching finding and presenting any form of digital document as admissible evidence in a court of law

Forensic Computing Anthony Sammes,Brian Jenkinson,2013-04-17 In this book Tony Sammes and Brian Jenkinson show how information held in computer systems can be recovered and how it may be deliberately hidden or subverted for criminal purposes Forensic Computing A Practitioner s Guide is illustrated by plenty of case studies and worked examples and will help practitioners and students gain a clear understanding of how to recover information from computer systems in such a way as to ensure that its integrity cannot be challenged and that it will be accepted as admissible evidence in court the principles involved in password protection and data encryption the evaluation procedures used in circumventing these safeguards the particular legal issues

associated with computer generated evidence and how to ensure admissibility of such evidence The Spaces of Justice
Peter Robson,Johnny Rodger,2017-08-13 This book looks at the architecture of the courts in Scotland and the importance of these civic spaces Given the importance of courts to the legal experience it starts by exploring why scholars have been so reticent in examining spaces in which the administration of justice takes place It notes the major changes already unfolding in Scotland and puts these into a historical and cultural context The authors trace the emergence of the notion of the dedicated courtroom space in 19th century Scotland and the ways in which the courtroom setting affected the exercise of power through law They show what factors led to the adoption of different architectural styles They examine the changes in the legal political and social world which drove such changes and how these changed in the 20th and 21st centuries They also examine the symbolic functions of courts both internally and externally They note the changes in the decision makers and their goals in the 21st century and how this will lead to a very different kind of courtroom in the near future They examine the wider factors affecting the process of litigation and trends in dispute resolution They conclude that the goals of transparency and civil dignity have serious implications for the kinds of spaces which will serve as halls of justice in the future Since these are driven it seems by financial imperatives it does not bode well for the retention of civic pride and community which the courts of justice might be said to embody Constitutionalism 2030 Christoph Bezemek,2022-08-25
Constitutionalism is in crisis And the crisis unfolds not only on a national or a regional level It is a global phenomenon Democracy is no longer on the rise the Rule of Law appears weakened political cohesion seems to erode Human Rights Protection finds itself questioned International Criminal Law struggles for broad recognition international trade may have lost some of its appeal Institutional actors find their authority questioned established political parties are threatened by ever changing popular movements But where to does the charted road lead How will the Crisis of Constitutionalism unfold in the years to come Nobody knows of course But at the same time Nobody is too keen to make an educated guess either This volume remedies that By giving nine eminent scholars in law and political science the opportunity to make their predictions where the constitutionalist project will stand ten years from now it creates a forum of deliberation that will not only aim at anticipating the developments in question but at the same time shape academic discourse on constitutionalism alongside it
