Power in the International Investment Framework Maria A. Gwynn, 2016-07-26 This book offers a unique analysis of bilateral investment treaties BITs By developing a new power focused paradigm for understanding the international investment framework the author illustrates why there was no paradoxical behaviour when developing countries agreed to the BIT regime and what has spurred their reaction against it now She also examines how attempts to regulate investment at a multilateral level have failed and why the rules of the framework are evolving Inspired by the work of Susan Strange
