

GRAMMAR RULES

ENGLISH
GRAMMAR

Grammar is the rules about how to speak and write in a language.

A list of five of the most common grammatical mistakes:

1 Subject Verb Agreement

Learners often get confused with using the appropriate form of the verb with the subject of the sentence.
For example: 'I live in Thailand' and 'He lives in Thailand' is the correct subject verb agreement of the verb 'to live'.

2 Possessive Nouns

Non-native speakers of the English are unsure about showing possession while writing or speaking in English.
For example: 'The book belonging to the girl' can also be referred to as 'The girl's book'.

3 Comparison of Adjectives

We add 'er' to compare short adjectives like pretty and thick; and we add 'more' for longer adjectives like handsome and intelligent.

4 Punctuation Mistakes

Punctuation errors, too, are very common, especially in the use of semicolons and commas.

5 Singular and Plural

Many new learners make mistakes in forming the plural form of singular nouns.

Masters, 2004-10-24 Practicing Writing examines a pivotal era in the history of the most ubiquitous and possibly most problematic course in North American colleges and universities the requireAd first year writing course generally known as freshman English Thomas Masters's focus is the mid twentieth century beginning with the returning waves of World War II veterans attending college on the GI Bill He then traces the education reforms that

took place in the late 1950s after the launch of Sputnik and the establishment of composition as a separate discipline in 1963. This study draws upon archives at three midwestern schools that reflect a range of higher education options: Wheaton, a small sectarian liberal arts college; Northwestern, a large private university; and Illinois, a large public university. *Practicing Writing* gives voice to those whose work is often taken for granted or forgotten in other studies of the subject: freshman English students and their instructors. Masters examines students' papers, professors' letters, and course descriptions and draws upon interviews conducted with teachers to present the practitioners' points of view. Unlike other studies of the subject, which have tended to focus more on the philosophy, theory, and ideology of teaching composition and rhetoric, Masters reveals freshman English to be a practice-based phenomenon with a durable ideological apparatus. By reexamining texts that had previously been considered insignificant, he reveals the substance of first-year composition courses and the reasons for their durability.

This volume provides current and extensive bibliographic essays and will help to define this new field of study for teachers and researchers. Following an introduction that summarizes the origins and significant texts in basic writing, the book is divided into three sections: Social Science Perspectives, Linguistic Perspectives, and Pedagogical Perspectives. The first section, which contains three essays, views the field through the lens of social, psychological, and political issues. The second section

also containing three essays examines contributions made from studies of grammar dialects and second language acquisition The third section in its four essays focuses on the design development administration and evaluation of basic writing courses the use of computers in basic writing classrooms the role of the writing lab and the preparation of basic writing teachers An appendix that reviews current textbooks for basic writing courses is also included as well as an index This book will be a valuable resource for teachers of basic writing in education courses and workshops that train teachers and tutors and in fields such as linguistics technical writing and Teaching English as a Second Language It will also be an important addition to public and university libraries and many education programs
