**Sea Kayaking** Philip Woodhouse, 2013-12-16 In Sea Kayaking comprehensive guide for those who travel the open waters in the Southern Hemisphere Philip Woodhouse Australian paddler and Royal Australian Air Force veteran shares his years of experience technical training and military teaching skills What began as a personal reference was soon developed as a training manual recommended by the Victorian Sea Kayak Club to its members and East Coast Kayaking to their patrons and Australian Canoeing students Sea Kayaking covers boat design kit requirements paddling skills health and well being meteorology the ocean environment navigation communications conservation and minimal impact camping conservation seamanship electrical bilge pumps solar panels light sources boat repairs leadership risk management basic safety and survival strategies as well as a brief overview about the history and various types of canoeing There is also a comprehensive glossary to assist the reader in understanding the terms and concepts discussed in the main text Woodhouses

work differs from most manuals about sea kayaking in that it is written from the perspective of someone who paddles the Southern Hemisphere. As such, the major differences between the two hemispheres—weather patterns, navigation laws, and terminology—are discussed as well as compared to their Northern Hemisphere counterparts. In the end, paddling skills are discussed, hypothermia is explained, and twenty-five knot winds are discussed. A three-metre tidal range can still produce a long haul across mud flats when the tide is out, and landing through two-metre surf is still scary, though a lot of fun, no matter where you paddle.

Sea Kayaking John Dowd, 2015-04-20. *Sea Kayaking* covers the basics of equipment and technique, including types of paddles and strokes, as well as such essential skills as how to read the weather and the water, how to navigate with and without GPS, and how to travel with a group. Still regarded as the bible for both new and experienced kayakers, after more than thirty years in print, Dowd presents practical advice on dealing with potential hazards from surf to sea ice to sharks, carrying out rescues, and planning for long-distance expeditions. New for this edition are hints about digital technologies for planning and navigating while kayak touring, as well as lots of tips for outfitting boats, adapting equipment, and finessing fishing technique while kayak angling, whether casting and jigging for fun on a day trip or trolling for dinner on a longer expedition. Also fully updated are the sections on managing risk and the inspiring stories of adventure, including Freya Hoffmeister's record-breaking circumnavigation of Australia and Japanese paddlers increasingly challenging trips around the islands and beyond. As sea kayaking continues to evolve, once the sport of a very few long-distance paddlers embarking on international expeditions, then the recreational pursuit of many weekend tourers, sea kayaking is now popular with many day trippers as well. As more and more paddlers take to the water for the day, the weekend, or many months, this classic guide continues to be required reading for those seeking adventure on the open ocean.

*Effective Leadership in Adventure Programming, 3E* Priest, Simon, Gass, Michael, 2018. *Effective Leadership in Adventure Programming* Third Edition details the art and science of adventure leadership. This thorough update of the groundbreaking text covers the latest research issues and trends in adventure education and provides a new model for building core competencies.
